TESTIMONIALS

ELIZABETH PRIESTMAN

CEO, International Deal Gateway

"We feel very supported and confident in the partnership we've forged."

Accubits Technologies Inc's platform has garnered thousands of users and become a trusted tool for business transactions. Flexible, positive, and responsive, they managed the project well and had no issues with language barriers or deadlines.

JON RATLIFF

Founder & President, eBlaze Marketing Inc.

"They are extremely nice and helpful."

Handling unexpected marketplace requirements, Accubits Technologies Inc proactively offered suggestions. Their ability to deliver custom solutions withing budgetary and timeline restrictions is notable. Customers can expect a communicative and supportive partner.

JEAN JACQUES ELONG

Founder, Kismet Group L.L.C

"I really feel comfortable with them."

Their ability to understand business needs paired with their deep industry experience resulted in a bug-free product. Accubits Technologies communicates efficiently and structures their projects really well compared to others.

MAHENDRA DHIRAJ

Marketing Advisor, PT GTech Digital Asia

"They delivered according to our expectations."

The team at Accubits Technologies Inc. has a wide portfolio and is highly-skilled in their field. They can meet deliverables in a timely fashion and are committed to their work.

ABOUT US

01 Accubits Technologies Inc is a US-based corporation with offices in 9 countries, serving clients from over 63 countries now.

02 Accubits has a robust global delivery network with development teams in India, Poland, Indonesia, and Vietnam.

03 Accubits Technologies started its first AI & Biological semiconductor research center in 2019 with a vision to provide cutting edge research-based AI solutions to its clients.

04

We have developers from 5 different countries, 3 different continents, speaking 12 different languages.

05

We always follow the best in class hiring strategies, attracting the top 5% talent. Only 3.4% of all the applied & sourced candidates get hired. We also have one of the lowest attrition percentages in Kerala (1.2%)

06

Extremely experienced leadership team from 9 different countries.

07

Accubits is mostly compared with other industry leaders like IBM, EY, Accenture, and TCS for Blockchain & AI development services. See our recognition page for more info.

WE ARE UNIQUELY DIFFERENTIATED IN THE MARKETPLACE

- Thought leadership
- Global delivery network
- Top rated engineers & scientists from 5 different countries over 3 different continents
- Enduring client relationships
- Deep industry expertise
- Equal focus on development & research for delivering cutting edge solutions
- Customer first culture
- Less than 2% attrition
- Vast experience in delivering ultra-scalable systems for Fortune 100 companies, Governments and startups

HEALTHCARE DOMAIN

APN HEALTH

CLIENT	APN Health
TYPE	Enterprise
LOCATION	US
PLATFORMS	NET, Enterprice application

We were updating the application design and workflow of the Navik 3D application. Navik 3D is an innovative 3D cardiac tool which uses plane fluoroscopy. We Developed and Integrated the Cryoballoon module to the system.

CSIR | Council of Scientific & Industrial Research

CLIENT | CSIR

TYPE | Government

LOCATION | India

We architected a Machine Learning model that classifies Raman Spectrum to determine whether a cell is cancerous or not. We used sophisticated in-house feature extraction and engineering mechanisms to reach above 95% accuracy level in real-world scenarios. Continuous evaluation and fine-tuning techniques are being carried out to best estimate the real-world performance up-to maximum.

EMR / E-HEALTH

CLIENT | KDISC

TYPE | Government

LOCATION | India

PLATFORMS | Hyperledger Fabric

We have a developed a blockchain platform that collects the details of various patients across the state and stored in a central Data Base. This information includes even confidential data such as the patient's name, contact information as well as the medical records. Implementing Blockchain Integration on the data will secure the information and store it in an immutable and secure database.

ACCUBITS AI PORTFOLIO

AI SOLUTIONS

At Accubits, AI is in the front seat, driving innovation across our customer's business lines. We are not just an R&D company that helps you with prototypes for trade shows but we help businesses enable AI in their existing systems and drive profitable results.

Microsoft CNTK | learn | TensorFlow

CUSTOM AI TOOLS

AI solutions tailored to solve the problem at hand.

CONVERSATIONAL AI

Conversational AI tools based on chat, voice interfaces

PREDICTIVE ANALYTICS

Pattern recognition and predictive analytics to generate actionable insights

VIDEO, IMAGE ANALYTICS

Real-time video analytics from CCTV cameras, image analytics, ANPR etc

SALES INTELLIGENCE

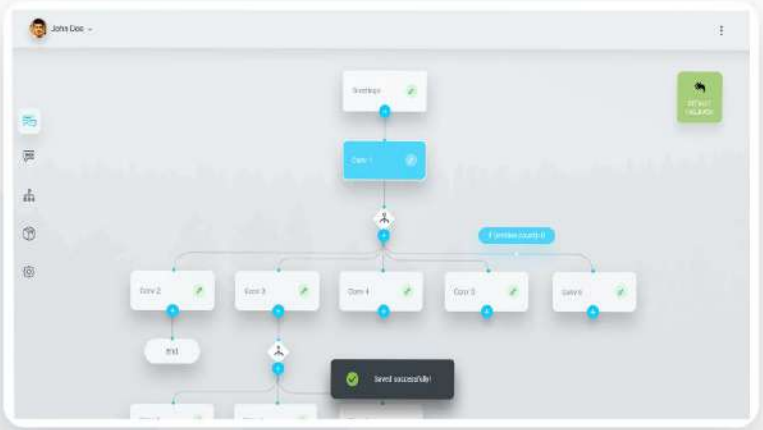

Lead scoring, deal scoring, Intelligent matching and sales insights

JOB AUTOMATION, RPA

Process automation, hybrid AI for job automation. AI API services.

AI CONVERSATIONAL TOOL

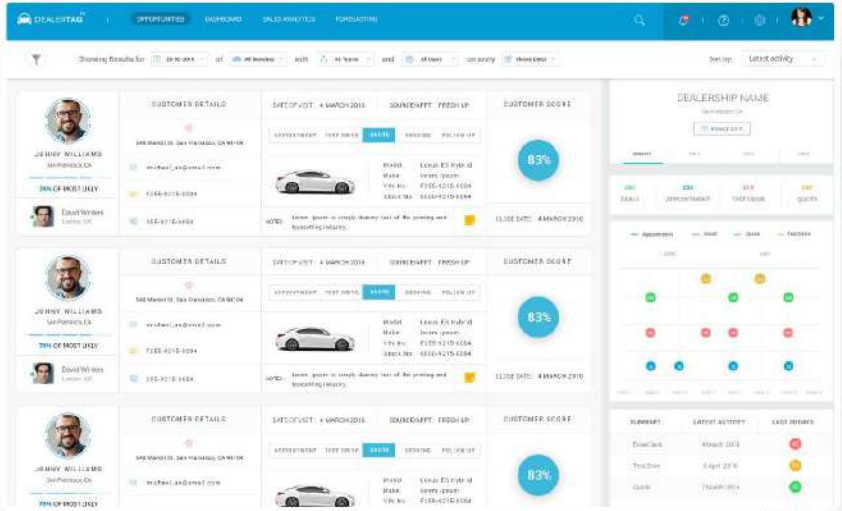

CLIENT	NASA
TYPE	Federal Agency
LOCATION	United States
TECHNOLOGIES	Natural Language Processing, NLU

We built an AI powered conversational tool for NASA to help them facilitate a smoother experience for inter-departmental communications. The tool uses Natural Language Processing to understand the queries raised by users and parses the available data to construct valid and accurate responses to the query. The customizability in creating multiple chatbots using a drag and drop interface helped our customer to create chatbots to provide quick information to their employees based on their queries.

SALES INTELLIGENCE PLATFORM | TAGRAIL

CLIENT	Tagrail
TYPE	Startup
LOCATION	United States
TECHNOLOGIES	Deep Neural Network, Predictive Analytics

Sales Intelligence Platform produces intelligent insights at every stage of a sales cycle. Combining machine learning and predictive analysis, the solution offers a new way to leverage the sales of an entity. It helped connect all the processes in a sales cycle with machine learning to generate intelligent recommendations, the ranking of leads, follow up insights, etc.

AI POWERED FACILITY MANAGEMENT SYSTEM

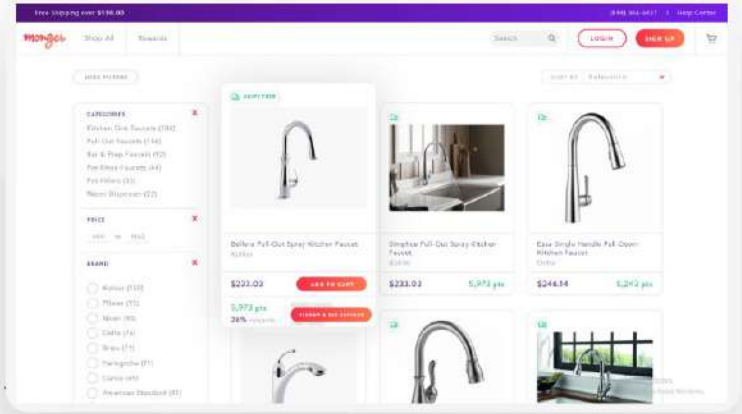

CLIENT	ADNEC (Abu Dhabi National Exhibition Centre)
TYPE	Enterprise
LOCATION	Abu Dhabi
TECHNOLOGIES	Computer vision, Machine learning

For ADNEC, we built a solution to automate facility management using AI. The solution analyses the behaviour of the crowd within the premises of ADNEC using computer vision technology. It tracks details such as the total number of people present, arrived, left, total employees present in the venue, region of high and low traffic, occupancy details of halls, booths, etc.

IMAGE CATEGORIZATION TOOL | monger

CLIENT		Monger
TYPE		Startup
LOCATION		United States
TECHNOLOGIES		Machine Learning, Image Processing

For Monger, we created an AI-powered image categorization tool using machine learning and image processing. The AI-based Inventory Classifier tool can compare two different product images and find the degree of similarity between the two.

The system does so by extracting key-points and features from the images, then it is matched together to calculate the degree of similarity. The solution helped Monger to do product categorization tasks 10 times faster as compared to the old process.

CUSTOM AI CHATBOT BUILDER

botzup

CLIENT	Botzup
TYPE	Startup
LOCATION	Hong Kong
TECHNOLOGIES	Natural Language Processing

Botzup is a simple and flexible collaborative platform for non-coders to build chatbot. It provides flexible interface, build-in features with multi-channel integrations such as Facebook Messenger, Line, Telegram, In-web and In-app. Botzup enables everyone to manage their chatbot easily without programmer involvement.

AUTOMATED CUSTOMER PROFILING

Reliance
Industries Limited

CLIENT	Reliance
TYPE	Enterprise (Fortune 106 - 2019)
LOCATION	India
TECHNOLOGIES	Computer Vision

The client wanted to categorize the vehicles that visited their retail petrol outlets. They initially tried to generate customer vehicle classification data by assigning the task to a few employees. But it was ineffective as well as expensive. To meet the business requirement, we built a solution using computer vision to identify, track and categorize vehicles into predetermined categories such as a car, bus, truck, bike, scooter, etc.

CONVERSATIONAL AI TOOL | etisalat

CLIENT		Etisalat
TYPE		Enterprise (Forbes 384 - 2019)
LOCATION		United Arab Emirates
TECHNOLOGIES		Natural Language Processing

For Etisalat, we built a kiosk-based in-store AI conversational tool that can address a customer's queries at the point of occurrence. Walk-in customers can interact with the device to seek information about the products they want. The system delivers meaningful, quick information to the customer which in turn enhances the user experience for the customers.

CONVERSATIONAL AI | USGS science for a changing world

CLIENT	|	United States Geological Survey
TYPE	|	Federal Agency
LOCATION	|	United States
TECHNOLOGIES	|	Natural Language Processing

For USGS, we built an AI-powered conversational tool to make its interdepartmental communications easier and streamlined. A user can chat with the virtual agent in natural language to inquire about various details of the organization. Our NLP engine learns the queries and fetches and delivers the right information sought by the user.

SAPPHIRE AUTOMATION | Apple

CLIENT	|	Apple Inc (via Foxconn)
TYPE	|	Enterprise(Fortune 11)
LOCATION	|	US
PLATFORMS	|	Enterprise software development, Data analytics, AI

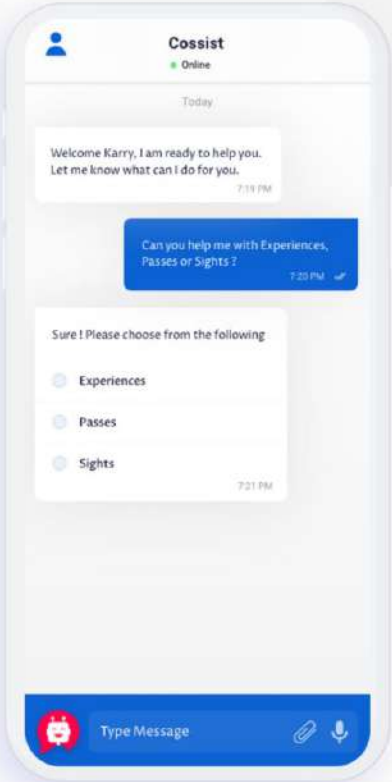

Sapphire automation allows manufacturing companies to perform data collection, analytics, equipment control, and factory automation.

IN-STORE AI CHATBOT

CLIENT	Cossist
TYPE	Startup
LOCATION	United States
TECHNOLOGIES	Natural Language Processing, OCR

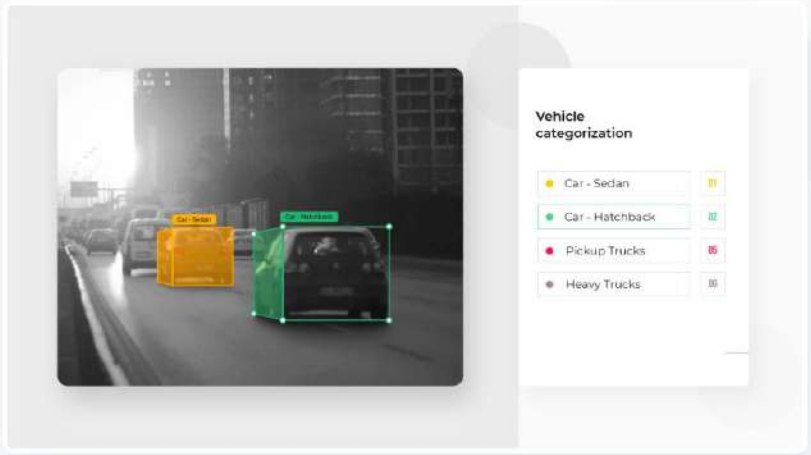

Cossist is an easy to deploy AI powered conversational tool. The admin can upload documents such as business catalogues, brochures, menu etc. to the Cossist dashboard and when a chatbot user poses a question, the NLP engine learns the query and fetches the answer from the available documents and delivers it to the user.

VEHICLE CATEGORIZATION

LARSEN & TOUBRO
It's all about Imagineering

CLIENT	|	Larsen & Toubro
TYPE	|	Multinational Conglomerate
LOCATION	|	India
TECHNOLOGIES	|	Computer vision, Machine Learning

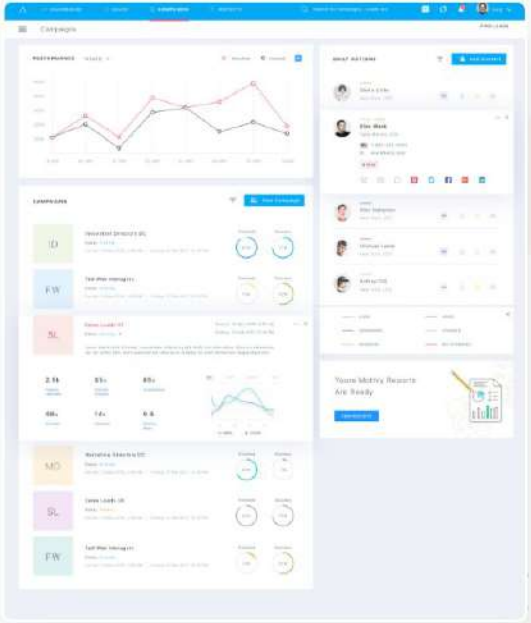

For Larsen & Toubro, we built an AI powered vehicle categorization software. The solution recognizes the type of vehicles passing under a CCTV camera using computer vision technology and categorizes the vehicle based on brand, segment etc. The system further uses the segmented data to generate actionable insights using predictive analytics.

AI POWERED CRM

CLIENT	Coglide
TYPE	Startup
LOCATION	United States
TECHNOLOGIES	Data Analytics, Big data

Coglide helps businesses to constantly innovate and grow. For Coglide, we built the AI based data analytics engine for lead scoring, deal scoring etc. The CRM consolidates a large volume of business data, which is processed with the analytics engine to generate intelligent insights that can help a business enhance its sales and marketing strategies.

ACCUBITS BLOCKCHAIN PORTFOLIO

BLOCKCHAIN SOLUTIONS

We have always been in the race to identify innovation before it reaches us from elsewhere. Our engagement with blockchain technology started years ago and today we have successfully helped our customers implement mass scale blockchain powered business ecosystems for their end consumers.

MultiChain | ethereum | corda

HYPERLEDGER SAWTOOTH | HYPERLEDGER | STELLAR

BIGCHAINDB | BitcoinCore | EOS

CUSTOM DAPP DEVELOPMENT

To build new business models with smarter and more secure DApps

SMART CONTRACTS

A trump card to gain the trust of customers and to facilitate secure transactions

CRYPTO ASSET EXCHANGE

Various payment methods, advanced reporting options, high-security standards etc

INDUSTRY SPECIFIC SOLUTIONS

Build ground breaking blockchain apps using our BaaS platforms

LAND REGISTRY IN BLOCKCHAIN

دائرة الأراضي والأملاك
Land Department

CLIENT	Dubai Land Department
TYPE	Federal Agency
LOCATION	Dubai, UAE
TECHNOLOGIES	Blockchain, Hyperledger Fabric

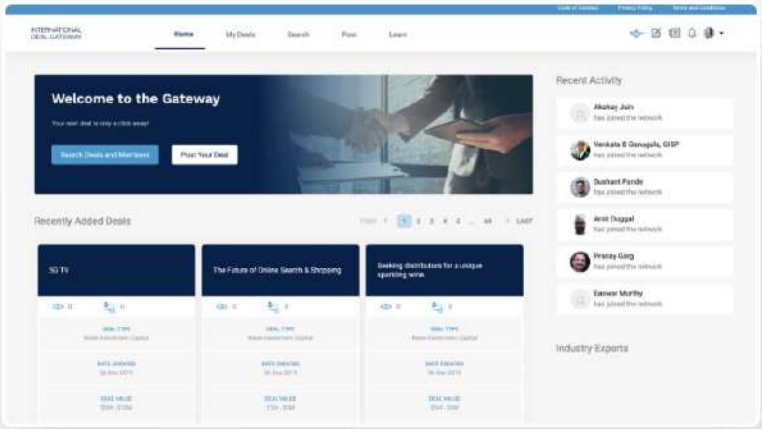

For our client, we built a blockchain-based land registry management platform. The solution incorporates many benefits of blockchain technology, such as the tamper-proof history of transactional records, so that no one can tamper with or forge a record of their own. Since the land transactions are executed through crypto transactions, the possibility of double-spending/double selling is eliminated.

INTERNATIONAL DEAL GATEWAY(IDG)

INTERNATIONAL DEAL GATEWAY

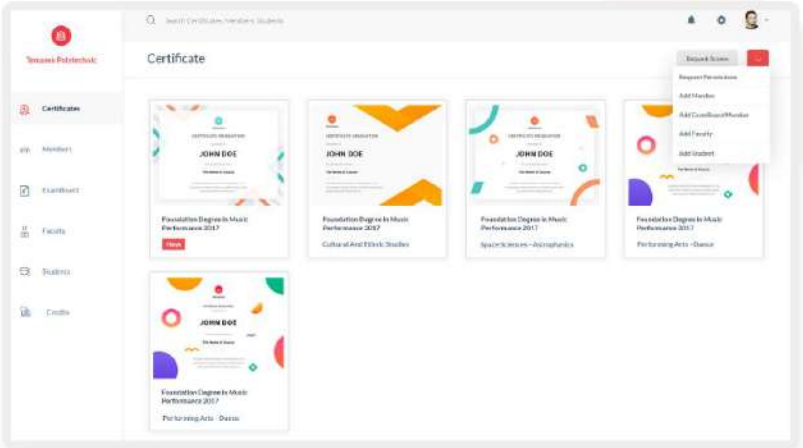

CLIENT	IDG
TYPE	Startup
LOCATION	Canada
PLATFORMS	Android, iOS, web

International Deal Gateway is an exclusive, invite-only community for successful entrepreneurs, investors and CEOs to transact peer-to-peer, on the world's first deal platform built on blockchain. Deal Gateway members can connect with other members across the globe to find their next big opportunity. Trust is built into our community through invite-only membership, however for increased security we are proud to also be the world's first deal platform built on IBM's Hyperledger Fabric, blockchain technology.

TAMPER-PROOF CERTIFICATION | EDUVALUE

CLIENT	EDUVALUE
TYPE	Enterprise
LOCATION	Singapore
TECHNOLOGIES	Ethereum Blockchain

For our client, we built a blockchain-based platform for the issuance and verification of certifications. The Blockchain-based certification solution offers a tamper-proof infrastructure of trust to uphold the reputation of a certification. The certifying authority, be it a college or a course provider, can create and issue a digital certificate secured using encryption, on the public network.

CRYPTO ASSET EXCHANGES

dxBex
UAE

AUSFINEX
Australia

SYNCHROBIT
HYBRID EXCHANGE
UK

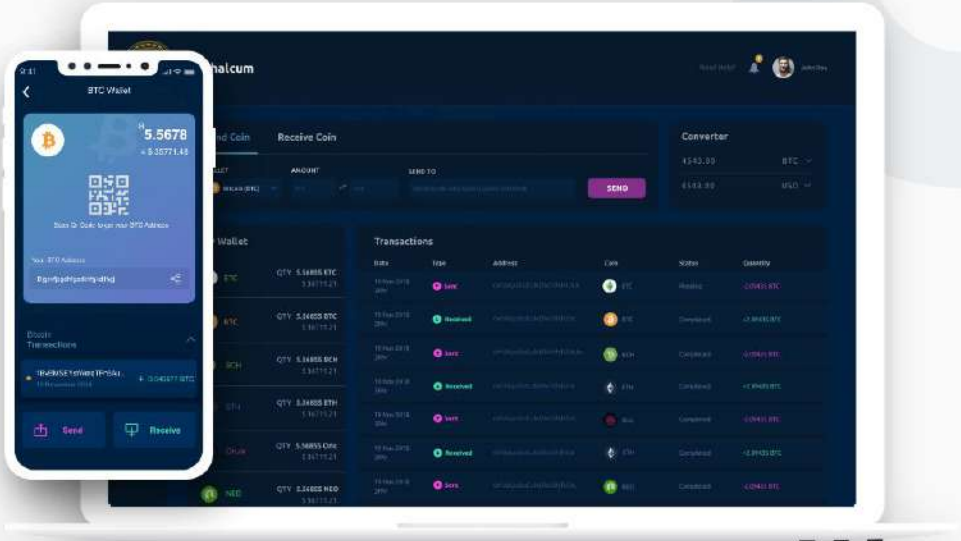

COSS
Singapore

We've developed crypto asset exchanges and trade engines for several clients from around the world. A crypto asset exchange makes it possible for a person to buy, sell or exchange crypto assets for other digital currency or traditional currency.

The platforms we built offers integration of various payment methods, advanced reporting options, high-security standards for maintaining the funds and invulnerability.

CRYPTO VAULT | Orichalcum

CLIENT		Orichalcum
TYPE		Startup
LOCATION		United Kingdom
PLATFORMS		Bitcoin, Ethereum Blockchain

Orichalcum is a digital storage initiative that aims to eliminate cyber thefts of digital assets using proprietary techniques incorporating blockchain, biometric solutions, artificial intelligence and high-end data encryption. Orichalcum provides a vault service where users can easily store, transact both digital assets and documents while safeguarding their assets.

ASSET TOKENIZATION

aXpire

gemstra

GigEcoin

LOCALTOKEN EXCHANGE

TalentSnap

SWISS ALPS MINING & ENERGY

BOLTT PROTOCOL

United Fans

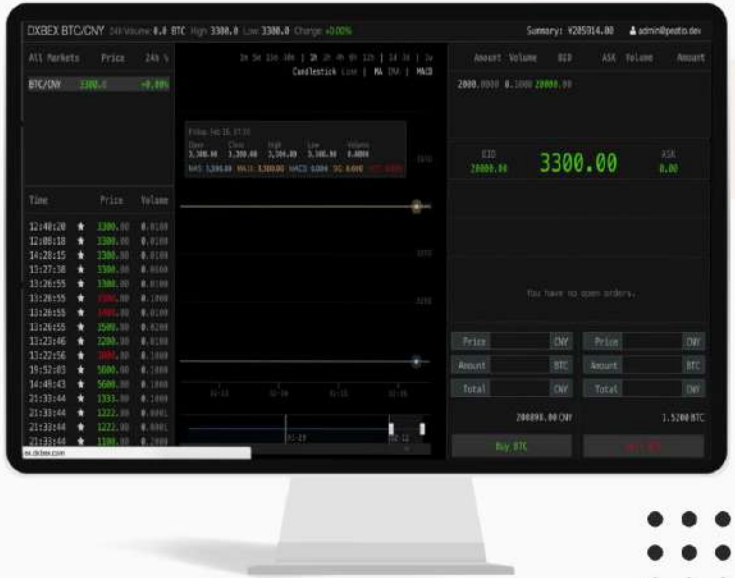

+12 More

We helped several companies from around the world in asset tokenization, crypto token development and smart contract development.

Cryptocurrencies are digital and cannot be counterfeited or reversed arbitrarily by the sender. The transparency and immutability of the crypto tokens help a business to quickly gain trust in the market.

CRYPTO ASSET EXCHANGE | dxBex

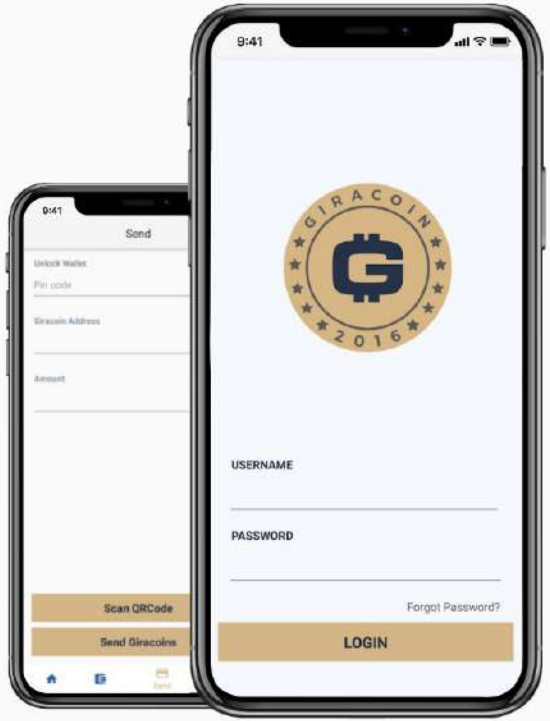

CLIENT		DxBeX
TYPE		Startup
LOCATION		Dubai, UAE
TECHNOLOGIES		Ethereum, Bitcoin Blockchain

We helped DxBeX to build their crypto-asset exchange. The platform supports multiple cryptocurrencies as well as fiat currencies including Dirham. The platform was architected to provide the best user experience as well as built with industry-standard security measures. The platform is architected with robust API services and Service quality control systems which facilitates rapid trading.

CRYPTO ECOSYSTEM

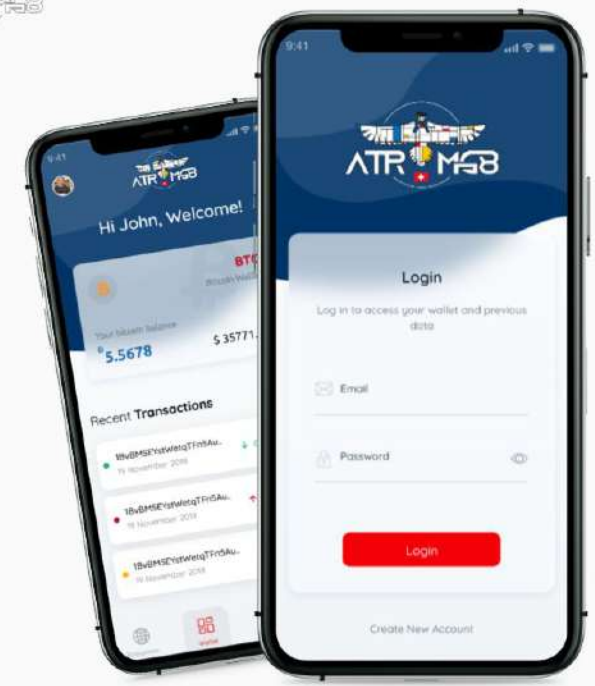

CLIENT	Giracoin
TYPE	Startup
LOCATION	Switzerland
TECHNOLOGIES	Bitcoin, Ethereum

For Giracoin, we developed the cryptocurrency token named as Giracoin. It allows every transaction to be securely and transparently tracked. It's multi-wallet provides desktop, mobile, and web-based wallets. The desktop wallets can also be used as a mining device and its build for major operating systems like Windows, macOS, and Linux. So without any technical knowledge, anyone can be a part of mining.

DECENTRALIZED MESSENGER

CLIENT	|	ATROMG8
TYPE	|	Startup
LOCATION	|	Switzerland
TECHNOLOGIES	|	Elements Blockchain, iOS, Android

For ATROMG8, we developed a custom crypto wallet, a crypto token, and a decentralized messenger platform. The ATROMG8 ecosystem is formed by an interaction between the individual services offered by platform partners and associates as well as the users. Together, to form a strong community, creating value for all the participants.

ACCUBITS MOBILE/WEB APP PORTFOLIO

PRODUCT DEVELOPMENT

Our Custom Product Development services help your business drive results faster with high performing products. Our engineers and experienced developers help to create rich products and applications that help businesses drive innovation and growth sustainably and edge out their competitors for market dominance.

WEB DEVELOPMENT

CRMs, CMS, ERP tools, Web apps etc. End to end coverage from UI/UX, Development to Deployment

MOBILE APP DEVELOPMENT

Android, iOS, wearable devices and apps, Cross platform applications

PRODUCT DEVELOPMENT

Custom product development to meet the business requirements

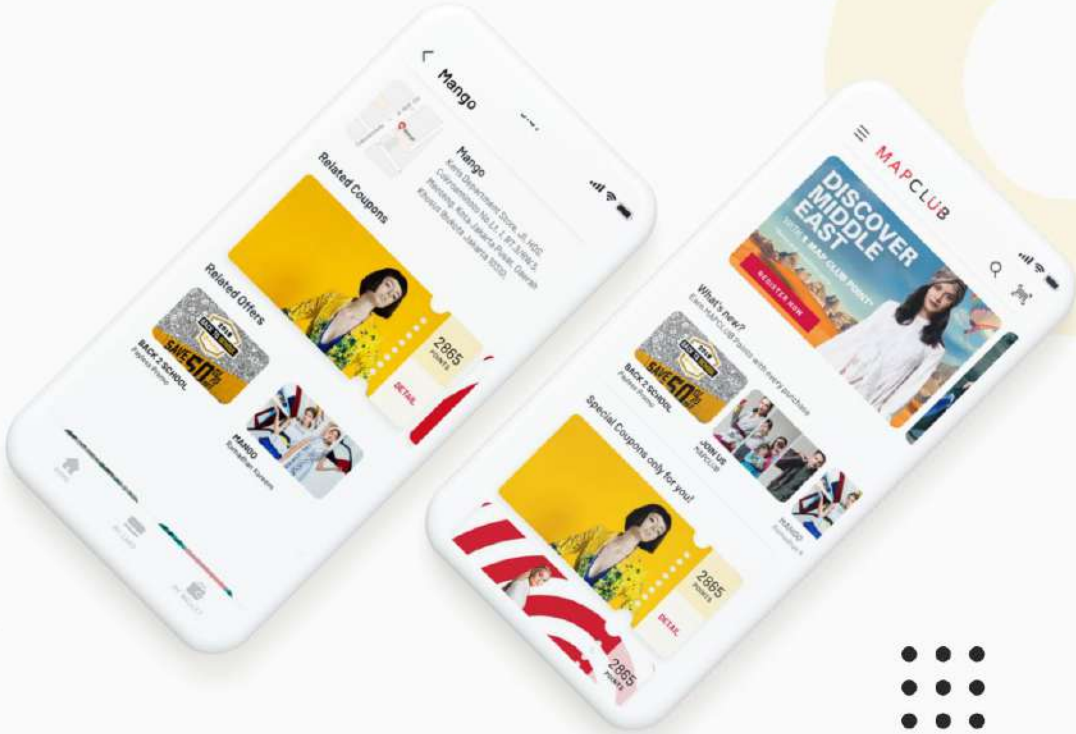

PRODUCT PROTOTYPING

Rapid prototyping and POCs development

MAPCLUB

CLIENT	GITI group
TYPE	Enterprise(Fortune 38 - 2018)
LOCATION	Indonesia
PLATFORMS	iOS, Android, Web

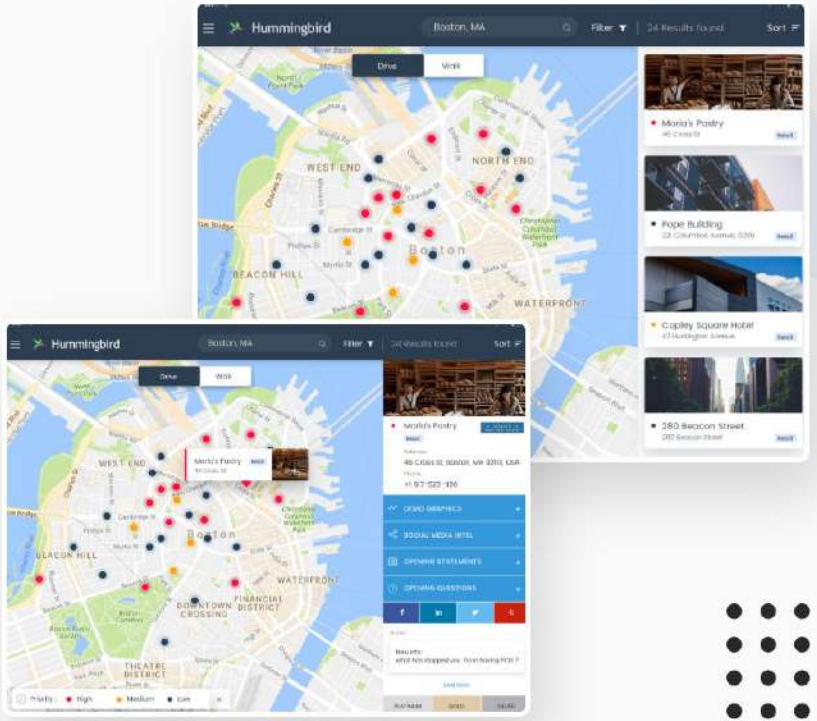

Largest lifestyle loyalty program in Indonesia with more than 8 million customers from Indonesia, singapore, Vietnam.
Accubits built an extremely scalable and user friendly web/mobile application for MAP which seamlessly works across all the platforms.

HUMMINGBIRD | verizon

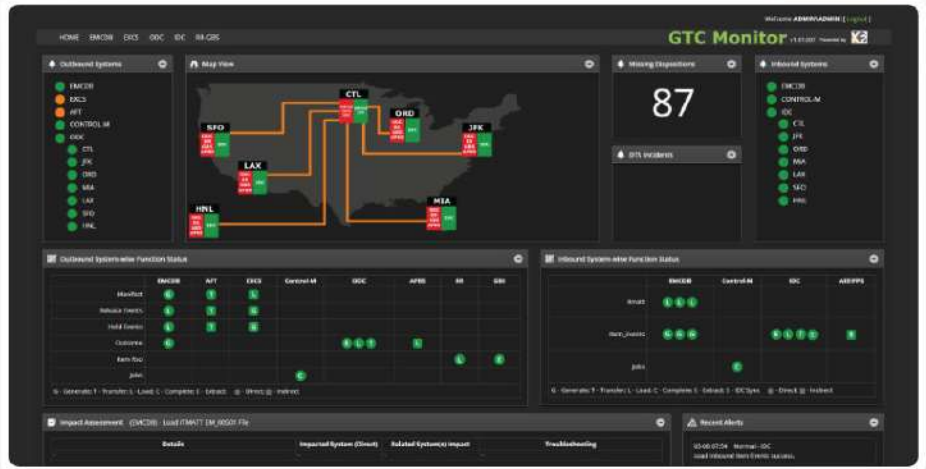

CLIENT	Verizon communications
TYPE	Fortune 15
LOCATION	US
PLATFORMS	Enterprise android

Humvee is an enterprise android application which helps the telecom giant to keep track of their sales agents and their actions all across the country. It is artificially intelligent enough to automatically optimise the routes and activities of every sales agents to be extremely effective

USPS CORE SYSTEMS

CLIENT	USPS
TYPE	Federal government
LOCATION	US
PLATFORMS	Enterprise development, Data analytics, AI

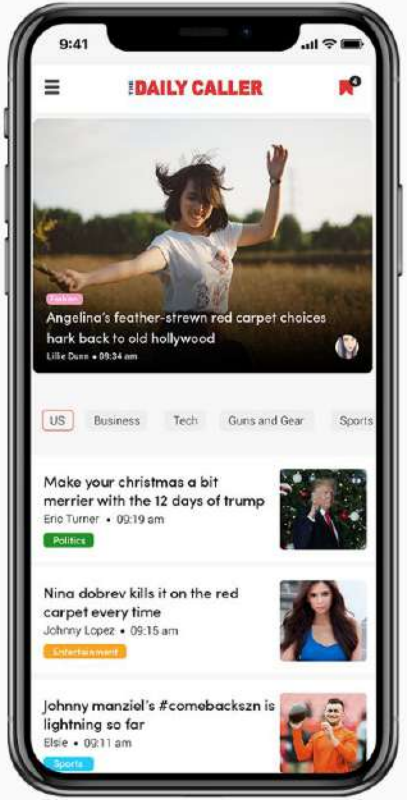

Accubits built and currently manage 6 different core systems of USPS. Accubits is also responsible for building the Data acquisition and analytics platform internally used by USPS called prospector.

DAILY CALLER

CLIENT		DailyCaller
TYPE		News (Startup)
LOCATION		US
PLATFORMS		iOS and Android

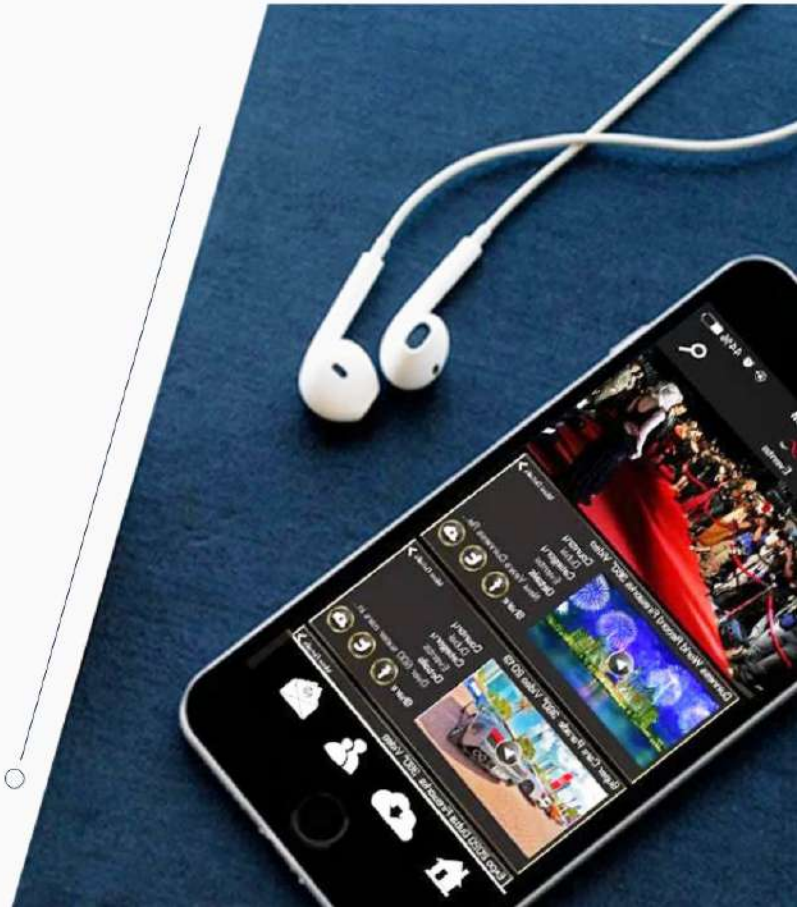

The Daily Caller is a right-wing news and opinion website based in Washington, D.C. It was founded by now Fox News host Tucker Carlson and political pundit Neil Patel in 2010. Launched as a "conservative answer to The Huffington Post", The Daily Caller quadrupled its audience and became profitable by 2012. The app has more than 300K active user at the moment.

360 VUZ - LIVE VR

CLIENT	MEA Innovations
TYPE	Startup
LOCATION	UAE
PLATFORMS	iOS, Android, VR

Vuz360 is a live VR application with all the social networking features, 360 camera live streaming, VR, chat and other sharing functionalities. The application currently have more than a million active customers using it to share their live VR content.

WAKANDA

CLIENT	Wakanda Technologies
TYPE	Startup
LOCATION	Switzerland
PLATFORMS	Android, iOS, Web

Wakanda is a video and text messaging application like WeChat focused on the african continent. It also provides other functionalities like booking cab, ecommerce, sharing contents, and micro payments.
