JR. SOFTWARE ENGINEER L1 JOB DESCRIPTION

About Accubits Technologies

We are a full-service software provider offering product development and digital transformation services to Governments, Tech startups, Fortune 1000 companies, and Businesses. We help organizations to be future-proof through data-driven solutions for mobile, cloud, and web platforms using cutting edge technologies such as AI, Blockchain and RPA.

We have over 200 people working in more than 8 countries worldwide. Our people have helped organizations in all industries improve business agility, employee productivity and customer loyalty. And our collaborative approach means we act as one global team, providing unrivalled opportunities for learning, development and a rewarding future

About the role

Software Engineer responsibilities include gathering user requirements, defining system functionality and writing code in various languages, like Python, PHP, Javascript and various frameworks such as NodeJS, Angular, ReactJS, etc. Ultimately, the role of the Software Engineer is to build high-quality, innovative and fully performing software that complies with coding standards and technical design.

During the initial probationary period of 3 months, all the candidates will be provided with adequate training and learning and development opportunities based on their aptitude and the requirements of the organization

Responsibilities include

- Execute full software development life cycle (SDLC)
- Develop flowcharts, layouts and documentation to identify requirements and solutions
- Write well-designed, testable code
- Produce specifications and determine operational feasibility
- Integrate software components into a fully functional software system
- Develop software verification plans and quality assurance procedures
- Document and maintain software functionality
- Troubleshoot, debug and upgrade existing systems
- Deploy programs and evaluate user feedback
- Comply with project plans and industry standards
- Ensure software is updated with latest features

Personal Attributes

- Flexible and adaptable in regards to learning and understanding new
- technologies.
- Strong written and oral communication skills.
- Strong interpersonal skills.
- Ability to conduct research into software-related issues and products.
- Highly logical.
- Technically proficient.
- Highly self-motivated and directed.
- Keen attention to detail.
- Proven analytical and problem-solving abilities.
- Ability to effectively prioritize and execute tasks in a high-pressure
- Environment.
