Graphic designer – a creative, curious communicator with strong execution skills to simplify complex ideas and engage very different people

Organisation summary

We believe that the world is a fascinating place, and that everyone has an innate curiosity that drives them to explore it. We want to empower both kids and adults to ask more questions and examine the world around them more closely.

We work with volunteers from businesses to deliver our programmes to students in schools and public spaces. This creates a double layered impact; shifting the mindsets of current and future parents (our volunteers) whilst helping current students enjoy their learning.

Read more about our programmes (which range from debating to scientific method) here

Role summary

We are looking for a passionate and creative individual who wants to spread the joy of making and great design. You will design, test and build engaging experiments, exhibits and interactive puzzles to spark kids' curio and thinking. If you would love to spread your love for good design and high visual concept, come on board and help us build something incredible.

Key responsibilities

- Developing graphics and material to share our work
- Creating high quality learning resources for our programmes including
    - Posters
    - Games
    - Supporting material for activities
- Ensuring all content aligns with and embeds our identity

Desired Skills and Expertise

Essential

- Curious, attitude of gratitude, passion for design and learning.
- Appreciates simplicity and executes scrupulously
- Eye for detail and quality
- Imaginative and explorative
- Strong oral and verbal communication skills
