Designer & Maker – A creative individual who wants to spread the joy of making and great design

Role Summary

Dharohar is looking for a passionate and creative individual who will design, test and build engaging experiments, exhibits and interactive puzzles to spark kids' curiosity and thinking. You will also work with volunteer teams, teaching them how to design and build effectively. If you would love to spread your love for good design and high quality making, come on board and help us build something incredible.

Key Responsibilities

You will be responsible for:

- Making experiments and science interactive
- Developing high quality games, puzzles and exhibits
- Explore various prototyping materials, techniques and tools for making the experiments
- Developing interactive, exhibits and displays
- Managing and improving our builders' workshop
- Training volunteers on how to design effectively
- Training volunteers on how to use tools and make beautiful, high quality products

To succeed in this role,

You must have:

- Inquisitive, attitude of gratitude, passion for making and learning
- Eye for detail and quality – ability to make beautiful models with excellent fit and finish
- Imaginative and explorative - ability to make quick dirty prototypes to explore and refine ideas
- Strong oral and verbal communication skills

It would help if you had

- Experience with CAD software such as Sketch Up or any other CAD software
- Experience with Human Centered Design/Design Thinking
- Basic graphic design and layout experience
- A playful approach
