## Product Manager - Dost Education (Full Time // India // Remote)

**As a Product Manager, you will** improve our products and launch new ones to build a meaningful experience for our users as we scale to 1 million families by 2025.

**About Dost Education:**
Dost is an ed-tech nonprofit building a platform to expand access to early childhood development in low-resource settings through parent education. Our mission is to unlock children's full potential by focusing on early learning - the time when 90% of our brains develop.

We believe that parents of any literacy level can play a critical role in developing their children's school and life readiness. In India alone, there are 150 million under-resourced caregivers who can benefit from resources developed for them. That's why our team at Dost Education - educators, entrepreneurs, and engineers - are passionate about using technology and user-centric product design to change the trajectory of families' lives.

Since 2017, we've grown from a small pilot with a few hundred mothers, to reaching over 100,000 families working with state governments. Join us as we continue to innovate, grow our reach, and deepen our impact. We are supported by some of the best funders in tech and social impact space like Y Combinator, Mulago, and many others.

Dost Education values diversity. We do not discriminate on the basis of race, religion, colour, national origin, gender, sexual orientation, age, marital status, veteran status, or disability status.

**How you'll be making an impact**

- Deeply understand Dost's users, product model, impact framework, and systems
- Build an empathetic, delightful, and impactful user experience through honing in on the right problems to work on
- Own product outcomes by following a structured approach to hypothesis building, running rapid experiments, and making decisions with the help of quantitative and qualitative data
- Engage with the rest of the team to ensure smooth functioning of the existing product and also to execute and launch new experiments, features, and products
- Document and communicate the approach and the learnings in a simple and consistent manner so the team's combined understanding of the user and Dost's approach improves over time
- Be the voice of the user in providing inputs to the strategic vision and product priorities with the team

**You'll be a great fit if you:**

- Have a strong passion for creating a positive impact on society

- Are scrappy, effective and iterative in your approach with a demonstrated ability to rapidly run and test conclusive product experiments. You approach questions with scientific rigour, but can execute pragmatically -- the simplest solution may be the best.
- Have experience in using a combination of quantitative data analysis and  talking to users to answer the right questions
- Are a strong written and verbal communicator -- explaining complex concepts simply is exciting for you. Have the ability to synthesize & communicate your insights in simple actionable ways to the entire team
- Are comfortable and effective at juggling multiple projects across teams simultaneously in a fast-paced work environment
- Thrive on a high level of autonomy and responsibility. Ability to self-organize and effectively manage your work is important
- Are curious and constantly keep asking questions, especially the ‘stupid’ ones
- Bonus points if you have experience with consumer tech products and working with tech teams.
