Work with Educational Initiatives

Content Development and Pedological Research

Founded in 2001, Educational Initiatives Private Limited (EI), is South Asia's leading assessment research and educational technology organization, working with the vision to create **"a world where children everywhere are learning with understanding".** Our goal is to reach a multitude of children across different strata of society, irrespective of the kind of education they are receiving today or the curriculum they are following. With our focus in educational research, assessments, pedagogy-based personalized adaptive learning (PAL), and a Science of Learning (SoL) repository of data and techniques to help children learn better, we continue to strive to leverage the twin levers of cutting-edge educational research and a technology-based solutions approach to revolutionize how children in the K-12 education space learn.

Over the past two decades, EI has undertaken over 80+ projects with 50+ government and civil society partners (16+ languages, 40+ detailed studies published) across geographies, socio-linguistic backgrounds in India and abroad, for more than 10 million students across different grades. EI has offices in Bangalore and Ahmedabad in India, with 350+ staff members specializing on different aspects of assessments, technology, training and project management. The top executives at EI serve/have served as advisors on boards of several educational committees for State and Central Government of India.

We have worked on several large-scale systems change projects in India with Sarva Shiksha Abhiyan (SSA), Gujarat Secondary Education Board (GSEB), SCERT Haryana, Bihar Education Project Council, SSA Tamil Nadu, Municipal Corporation of Greater Mumbai (MCGM), Himachal Pradesh, Uttar Pradesh government agencies and the countries of Maldives and Bhutan. Our work has been funded by UNICEF, World Bank, United States Agency for International Development (USAID), Department for International Development (DfID) - UK, The Partnership to Strengthen Innovation and Practice in Secondary Education (PSIPSE), MacArthur Foundation, Michael & Susan Dell Foundation (MSDF), Hewlett Foundation, McKinsey, Harvard University and University of Newcastle.

The People

The key driver of EI's success is the quality of our staff. Our team includes over 300 professionals combining a unique depth of pedagogical and assessment expertise with experience from working with schools, government systems and top-tier organizations in education, and leading academic institutions. The team includes Harvard Business School (HBS), Indian Institute of Management (IIM) and Indian Institute of Technology (IIT) alumni, university rank-holders at Ph.D. and Master's Level in Science, Social Sciences and Humanities, along with teachers with several years of school experience, curriculum planners, teacher trainers, and people who have been instrumental in developing textbooks. The organization has specialized internal teams working on test development, data science, educational research, psychometrics, personalized learning, and IT development.

For the roles, ideal candidates are ones;

- who have graduated (in any stream/discipline) from top tier colleges in India and abroad have worked in similar roles or have strong interest in the roles
- who are passionate about the education reform and realize that their actions can translate into

real-life impact on the ground

- who are driven to learn and solve some of the most pressing problems to fix the education system Operating style suited to working in a small-organization setting, where teamwork and resourcefulness are highly valued
- driven to excel in every aspect of work with high level of innovation and strong perseverance Entrepreneurial spirit and 'can-do' attitude
- T-Shaped Approach: have both breadth in how to collaborate and innovate across disciplines and depth in specific areas of expertise

The Role

The role of an **Educational Specialist** can be broadly divided into three components, namely creation, review and research. Key responsibilities will involve -

1. Creating engaging content for our various assessment and learning solutions

2. Reviewing content, focusing on -

- Quality of the question (concept tested, grade appropriateness, phrasing)
- Technical correctness
- Strength of the distractors
- Syntactical/semantic errors

3. Researching on pedagogical content methodologies -

- Through reading of academic journals
- Analysing data on questions
- By interacting with external subject experts
- By interacting with students and understanding how they think

Required Skills:

- 0-3 years of experience in content creation/teaching role
- Excellent written and oral communication skills
- Ability to create and source engaging assessments for students
- Ability to critically analyse questions, tests, and projects for practical use in the context of the classroom
- Basic technological awareness (Windows functions, MS Office, email features)
- Sticking to tight schedules and effective workload management

Preferred Skills:

- Graduation or Post-graduation with strong academic records
- Ability to interact in a productive manner with teachers and students, if needed; this should be geared towards gleaning information that will help us improve our understanding of how students learn and also towards improving our offerings
- Should enjoy working in a team and across teams
- Should enjoy healthy debates and arguments which are critical for insight development

Location: Ahmedabad/Bangalore/Anywhere in India (during Covid times)

Compensation: Remuneration will be competitive with Indian development sector pay scales and will depend upon the candidate's experience levels.
