Research Associate, Catalyst Bangalore

Euromonitor International is the world's leading independent provider of strategic and tactical market research. We create data and analysis on thousands of products and services around the world.

Brief overview of the role

Euromonitor's Consulting division provides custom research solutions that help clients achieve specific goals and objectives across a wide range of country markets and industries making for a fast-growing, dynamic, and challenging working environment.

We are currently expanding our research capabilities in Bangalore to address growing global demand for custom research solutions. To this end we are setting up a unit that will become our Analytical Centre of Excellence, and which will focus on a) working with our global Consulting teams on large and complex projects, and b) develop and deliver its own range of products.

The ideal candidate will have proven experience in business, competitive intelligence, consulting, or market research. He/she will possess excellent written and oral communication skills in English and strong analytical, numerical and data manipulation skills. We are looking for motivated self-starters looking to become internal industry or solution experts within our Consulting team and Euromonitor. You will be required to conduct primary and secondary research on industry and company sources; review, query and consolidate research materials from in-country researchers; and prepare complex data sets in Excel and management reports in PowerPoint.

Background in statistics, computer science, applied mathematics or similar field is a key advantage. We are looking for individuals who have interest in innovative ways of data visualization, cleansing data, data science, pattern recognition, artificial intelligence.

Required skills and proficiency

- High level of numeracy; the ability to build data models and run comprehensive checks across complex data sets compiled from various sources
- Good analysis and report writing skills; the ability to use all insights gather to build a comprehensive summary report
- Confidence in engaging with trade sources in order to gain additional insight and validate information found in the public domain
- The ability to use desk research effectively to bolster and verify insight from other sources
- Excellent oral and written communication skills
- The ability to perform well under pressure; working efficiently and fast when required by tight project timeline and deal with tough client questioning in a professional manner
- Strong organisational skills and ability
- Tenacity and attention to detail
- Proficient in Excel and PowerPoint
- An engineering, mathematics, physics or computer science background an advantage
- Experience in data manipulation and cleaning, multi-dimensional scaling and numerous types of data transformation
- Working experience in VBA, JavaScript or R
- Ability to demonstrate and communicate findings to all stakeholders and the leadership team
- Other widely spoken language and editorial skills an advantage
- Ability and comfort to work independently and make key decisions on projects
- The confidence and ability to take the post forward with minimum supervision

Optional qualifications

- Knowledge of econometric methods
- Experience in Python, SQL, SPARQL, HTML or similar
- Experience in web scraping
- Experience in implementing data-driven learning algorithms
- Knowledge of Machine Learning algorithms like Neural Networks, Random Forest
- Experience in Semantic Search, Text Mining, Taxonomy, Ontology
- Knowledge of BI tools such as Power BI and Tableau

Why work for Euromonitor?

International: not only do we have a very multinational workforce in each office but we are all dealing with our 15 offices worldwide on a daily basis. With 15 offices globally there are regular opportunities for international transfer.

Hardworking but sociable: our staff know how to work hard but also how to enjoy themselves! We pride ourselves on creating an appropriate work-life balance, with flexible hours and regular socialising including frequent after work meet ups, summer and Christmas parties and a whole range of sports and other groups to be involved with.

Committed to making a difference: We think that people are looking for something

worthwhile in a company beyond the workplace. Our extensive Corporate Social Responsibility Programme gives each member of staff two volunteering days a year in addition to holidays. It sees us reaching out into the local community with our mentoring, group volunteering, and fundraising initiatives as well as supporting international charities through our website sales, matching staff sponsorship fundraising, and carbon offsetting all our flights, amongst many other activities.

Opportunities to grow: we offer extensive training and development opportunities at all levels. The vast majority of our managers and directors have been promoted from within and many have moved across departments as well as upwards. We pride ourselves on identifying and rewarding talent.

Equal Employment Opportunity Statement: Euromonitor International does not discriminate in employment on the basis of race, colour, religion, sex, national origin, political affiliation, sexual orientation, gender identity, marital status, disability and genetic information, age, membership in an employee organization, or other non-merit factor.
