About Goodera

Goodera is a technology platform that makes CSR, volunteering and sustainability activity transparent, measurable and engaging. Used globally by corporations and foundations, Goodera simplifies CSR, volunteering, and sustainability by automating processes, managing data and facilitating coordination with nonprofits. With program health reports available at the click of a button, Goodera enables companies to showcase quantified impact to customers, employees, and investors with ease.
Goodera is currently deployed by 200 clients -- including Target, Gap, Dell, Amazon and P&G – and engaging 1 million + employee volunteers to 40,000+ nonprofits across 90+ countries across the globe. Managing over $500 million in CSR capital, the Goodera platform is used to collect and aggregate data from internal and third-party sources. Goodera social and environmental impact reports are used for internal progress tracking and in ESG reporting to investors, analysts and corporate boards.
Goodera is co-headquartered in San Mateo, CA and Bangalore, India and is backed by Omidyar Network, Nexus Venture Partners, and SAIF Partners. For more details, please visit us at www.goodera.com

Job Position: Impact Assessment Associate (Full Time)

Location: Bangalore / Mumbai/ Delhi NCR

Function: Global Delivery

Key Responsibilities:

1. **Design Impact Assessment Tool**
   - Study the log frame and theory of change to identify the outcomes and impact indicators as well as corresponding process indicators
   - Develop baseline metrics to measure key outcomes and impact
   - Finalize timelines and develop the design for the on mid-line and end-line evaluations
2. **Data Collection Process**
   - Identifying the methodology for data collection and managing timelines
   - Conducting research for corroborating data from secondary sources
   - Developing questionnaires in line with the designed metrics for the primary data from key stakeholders of the program
   - Orienting and monitoring the team responsible for administering surveys for primary data collection
3. **Data Management**
   - Organizing, collecting, storing, analysing, and protecting data
   - Creating and Enforcing policies for effective data management
   - Responsible for constituting the independent ethics committee for conducting the assessment.
4. **Data Analysis and Report Writing**
   - Undertake data analysis and noting insights and interpretations form the data
   - Drafting report including the findings from the assessment, analysis and recommendations
   - Collaborating with external agencies, if necessary for publishing findings on other platforms
5. **Team Management**

- Identifying training needs for the team

What are we looking for?

- A minimum 2-5 years' experience in impact assessment, monitoring and evaluation, data analytics and data management
- Exposure to CSR/Sustainability projects
- Willingness and ability to collaborate and work within teams
- Problem solving skills and critical thinking
- Excellent presentation, and communication skills
- Willing to travel for on field assignments (once on ground situation improves) with appropriate health and safety measures
- A bias toward action and ability to manage multiple projects, juggle priorities and deliver on tight deadlines.

What we have to offer:

- Work with a performance-oriented team driven by ownership, open to experiments and passionate about creating impact.
- Young and Vibrant team that is passionate about doing Good
- Opportunity to learn and grow in a fast-paced, multi-stakeholder startup environment
- Great learning culture, with the exposure to work on a variety of client projects.
- Opportunity to grow into project lead roles for the fast-paced learner.
- Flexibility to work in a hybrid environment for the foreseeable future
- Cross learning across ESG, Product, CSR and Volunteering and Impact Creation
