IHIF

About Indian Head Injury Foundation:

Indian Head Injury Foundation (IHIF) was founded with a mission to reduce the morbidity and mortality of patients with severe Traumatic Brain Injuries (TBI) through advocacy, public awareness programmes, trauma courses and neuro-rehabilitation. With India unfortunately being the country with the highest rate of head injury in the world, we also take it upon ourselves to spread awareness on safety precautions, especially on the roads. Alongside this, we are tirelessly building upon the effective provision of pre-hospital care through first-aid training and the provision of neuro-rehabilitation through IHIF rehab centres, three of which are up and running in Delhi, Jodhpur, and Patna.

More information can be found here: http://indianheadinjuryfoundation.org/

Position:

For the position of **Executive Assistant to the Medical Director of Indian Head Injury Foundation**, we are looking to hire someone who has recently graduated, is deeply passionate about disability rights and increasing access to healthcare, and has a desire to work in the non-profit/social sector.

The Executive Assistant will work closely with **Dr Rajendra Prasad**, the **Medical Director of the IHIF**.

About the Medical Director:

Dr Rajendra Prasad is a Senior Consultant Neuro and Spine Surgeon with over 40 years of experience gained primarily in the UK and in India. He is passionate about making neurorehabilitation and assistive technology accessible to people with disabilities and the elderly. At the Indian Head Injury Foundation, he oversees its programmes on injury prevention, trauma training and neuro-rehabilitation. He is also the Founder-Trustee of Kara Medical Foundation, an NGO towards making assistive technology accessible to people from low-income backgrounds. Dr Prasad is a recipient of three international awards and a lifetime achievement award.

Location: New Delhi

Main IHIF Activities:

1. *Improving pre-hospital care* by advocacy with the Government and public awareness programs on road safety.

   So far, we have conducted the 'Children's Ride with Safety Programme' in Delhi Government Schools where more than 30,000 children helmets have been distributed, and 78 Primary Trauma Care courses (PTC) and disaster drills for doctors, nurses, paramedics and first responders.

2. *Improving hospital care of the trauma victim* by conducting neuro-critical care courses and PTC courses for I.C.U and Emergency Department staff.

3. *Improving access to neuro-rehabilitation and Assistive Technology (AT)* in India, which is at present non-existent.

This is through conducting workshops, training courses for therapists and running three state-of-the art neuro rehab centers in Delhi, Jodhpur and Patna. We are in the process of setting up an A.T. Skills Lab at these 3 neuro-rehab centres.

Roles and Responsibilities:

1. Research
    a. Research on the need for tele-health services, neuro-rehab, and assistive technology for persons with disabilities
    b. Research on making these services accessible to PWDs from marginalised backgrounds
    c. Research of the delivery and impact of the aforementioned services (measurable outcomes research)
2. Project Management and Fundraising
    a. Research on funding mechanisms (GOI/International/Corporate Social Responsibility)
    b. Support developing funding/grant application
    c. Support fund raising activities
    d. Develop project plans
    e. Support project implementation
    f. Support stakeholder management
3. Assist in running the existing IHIF centres
    a. Assisting people who visit IHIF procure other services and devices, such as wheelchairs, canes, etc.
    b. Other client-facing assistance
4. Support raising online presence/social media
5. Create public awareness programmes through outreach and social media
6. Coordination with different team members and collaborators

Capabilities:

- Passionate about working towards disability and healthcare rights, and capable of incorporating this approach into existing IHIF activities
- Passionate about social/not-profit sector
- Eager to learn
- Flexible to work with different time zones
- Team player
- Independent & self-starter
- Excellent analytical skills (statistics)
- Excellent Microsoft Office skills (Power point, Word, Excel)
- Excellent communication and presentation skills (written & oral English)
- Knowledgeable about social media marketing

Minimum commitment required: 1 year

Compensation: 3.6 lakhs p.a.

Note: This role is based in New Delhi. Given the hands-on nature of the role, we require someone who is able to travel to the Medical Director's office and is ready to make the occasional trip to other IHIF centres,

whenever it is safe to do so. However, not all work will require in-person attendance, and we can schedule work-from-home days for such work.

To apply:

Please send your CV and a short cover letter (200-300 words) to Dr Rajendra Prasad (neurosurgeryindia@gmail.com).

Deadline: 11:59 PM Wednesday, 15 September.
