Role Details	**Team/ Function**	Supply Chain | Analytics
	Location	Noida Sec 125
	Designation	Supply Chain Analyst

Reporting	
Reporting Manager	Associate Director - Supply Chain
Direct Reportees	NA

Role Objective

The person will be part of the Central SCM Engineering and Planning team and grow to be the owner of all SCM data and insights (including generation, analysis and scalable distribution of actionable insights).

Role Responsibilities

There are 3 primary responsibilities:

(i) Understanding of SCM processes and metrics - Incumbent will be trained in supply chain concepts, processes and metrics. Motivation to make a career in supply chain will be required.

(ii) Data Extraction and Analysis - work on SQL for extraction and Python/R for data analysis and cleaning. Incumbent must build thorough understanding of systems and data architecture corresponding to SCM processes over the training period.

(iii) Insight generation and scalable distribution - Insights should have meaning and should be actionable by the ground teams. Development of real time dashboards, frontends to distribute the insights rather than depending on excel sheets. Development of application development, creation of Cron scripts etc.

Key Stakeholders
