**Job Description – Software Developer**

==========

We are looking for a JavaScript developer who is proficient with React.js.

Your primary focus will be on developing user interface components.

You will ensure that these components and the overall application are robust and easy to maintain.

Therefore, a commitment to collaborative problem solving, sophisticated design, and quality product is important.

Responsibilities

==========

Developing new user-facing features using React.js

Building reusable components and front-end libraries for future use

Translating designs and wireframes into high quality code

Skills

======

Proficiency in JavaScript, including DOM manipulation and the JavaScript object model

Understanding of React.js and its core principles

Knowledge of popular React.js workflows (such as Redux)

Familiarity with newer specifications of EcmaScript

Familiarity with RESTful APIs

Knowledge of modern authorization mechanisms, such as JSON Web Token

Familiarity with modern front-end build pipelines and tools

Familiarity with Git

Ability to write function components

Ability to write custom hooks

Ability to write class based components

Ability to use CSS flexbox for layout

Ability to write CSS to make pages responsive

Salary – 5-10 LPA
