**Organization Overview:**

Piramal Foundation (PF) is a leadership development organization which works with education leaders to improve student learning outcomes at scale. We work on catalysing public system change by developing a cadre of competent and passionate leaders who have the foresight and courage to sustainably impact the nation's grassroots at scale. In pursuance of this objective, we currently work in 13 states on building the leadership skills of government education officials at school, block, district and state level.

We strongly believe in the capability of the government systems in India to be the drivers of large-scale change in the domain of education, and over the years, we have worked with governments across multiple states to demonstrate the impact of our efforts on Student Learning Outcomes. With many central and state government bodies shifting focus onto working on systemic change in education, PF is grateful to have been recognised as a value-adding partner in driving transformation initiatives in education at the State and District levels.

Our interventions with our government partners are made through:

1. Piramal**/**Gandhi Fellowship is an intensive 2-year youth leadership program to build leadership capabilities of young leaders through rigorous and reflective experiences at grassroots and with government system.
2. Principal Leadership Development Program is designed to build the leadership skills of headmaster and teachers at government schools to improve student learning outcomes.
3. District Transformation Program is designed to develop CRCs/BRCs as Coaches and Master Trainers within the district to develop teacher capacities, in turn leading to fostering of learning outcomes of children in the district.
4. State Transformation Program is a systemic change program designed around working with top educational bodies and education officials in the state to build a cadre of highly trained Master Coaches and Master Facilitators to train the teacher trainers within the state and improve the key processes of the state education system.

**Function Overview: Organization Development (OD)**

Organization Development was set up as an independent function within the organization in the year 2017 to work on strategic HR projects and manage HR transformation. This function is responsible for designing and institutionalizing projects and processes across HR disciplines to achieve strategic business goals and organizational objectives in partnership with the business heads. Some of the key areas where this function plays a key role are organizational competencies, performance management, career paths, job-levelling, compensation benchmarking, HR policies and culture articulation and retention.
