Organisation description

Located in rural Bengal, The Levelfield School already had a transformative effect on how education is imparted in India.

The school has been at the forefront of leading the battle against rote-learning, through advocacy (please google many articles by the founder and the student body on this), and more importantly, through practice.

We have been celebrated for our intensely skill-oriented education, with no textbooks before the high school. We are celebrated for our innovative methods for imparting reading, speaking, writing, and thinking skills: ours is probably the only school in the world where movies like ‘The Godfather’ or ‘The Pianist’ are teaching materials.

We prepare our students for life, not just for exams; however, our students have performed spectacularly in exams too. With their excellent results, many of our students have gone on to study in the top universities in the US and in India.

Candidate profile

We are looking for teachers who do not believe teaching is a limited job: a teacher is sometimes like a doctor who diagnoses the causes of learning difficulties from the minutest of symptoms; a teacher is sometimes like a judge, as how he adjudicates disputes inside the classroom shapes the very concepts of fairness and justice in young minds; a teacher is also like an entrepreneur as managing education in a rapidly changing world requires similar dynamism; most importantly, a teacher must be a leader who is more of an inspiration rather than a mere dispenser of instruction.

We are open to right candidates with strong passion for learning regardless of undergrad or post-graduation specialisation.

Compensation

The compensation will be **12 lakhs per year**, broken down as below (pre-tax):

Monthly component: Rs 9 lakhs (Rs 75,000 per month)

Assured year-end bonus: Rs 1.8 lakhs

Subsidised value of the stay at the school campus in shared air-conditioned serviced apartment and food: Rs 1.2 lakhs (Rs 10,000 per month)
