Talent Acquisition Associate

About Us

TopHire (https://tophire.co) is a recruitment marketplace that makes it fast and easy for top tech companies in India to hire the top 2% of engineers, product managers, data scientists, and designers. Each candidate approved onto TopHire is handpicked and vetted by our team ensuring our clients stop wasting time on bad candidates and only focus on the best.

TopHire is founded by Sameer Parwani, previously founder of CouponDunia, and Siddharth Gopi, ex-product manager at Crowdfire.

Is TopHire a Consultancy?

No. We're a tech startup. Tech is at the center of everything we do. The core product is an online recruitment marketplace (i.e. somewhat like a naukri, iimjobs, etc) which is very different than the core product of a consultancy. Additionally our founders have bonafide tech backgrounds. We are disrupting the tech hiring space with an innovative and much needed product.

As with most products, an added personal touch goes a long way towards customer success. TopHire is no different and hence we are building out our client and candidate facing teams with positions such as this one.

About the Role

As a member of our Talent Acquisition team, you'll perform a combination of the following two roles:

> Talent Analyst - As a Talent Analyst you will pitch and persuade relevant candidates to create a profile on TopHire. After the candidate registers, Talent Analysts work with candidates to ensure the candidate's profile is complete and compelling. You'll also provide whatever support is necessary for the candidates through their TopHire journey.
>
> Associate Account Manager – As an Associate Account Manager you'll work alongside Account Managers and be jointly responsible for the success of the clients that you are assigned. You on-board clients, understand their hiring needs, demo the platform to their recruitment and engineering teams, suggest relevant candidates, and help with interview coordination.

Clients
Our clients include India's best tech companies such as Swiggy, Flipkart, Dream11, Truecaller, Times Internet, Dunzo, PhonePe and many more.

Company Mission
Our mission is to enable Indian product companies to build great technology teams with ease. There's countless founders with great ideas. Ideas that could disrupt the way we live our lives - the way we wake up in the morning, the way we commute, the way we work, the way we play, the way we do everything we do.
But far too many of these founders are prevented from realizing their vision because they aren't able to scale their technology teams. They aren't able to find enough of the right quality engineers in the right amount of time.

TopHire

We're changing that. We're making sure that the most promising founders and the most promising product companies are able to build out world-class technology teams quickly and reach the heights that they deserve to reach.
