Univ.AI

Senior Business Analyst

Who are we?
At Univ.AI, we are defining the future of tech higher-ed. We are founded and run by Harvard and UCLA professors of Artificial Intelligence. We teach **LIVE** online, and provide a learning experience that emulates the experience of learning at world's top universities. We are introducing a second learning system (under a subsidiary brand) - a very unique LIVE equivalent of "coursera" where beginners of all stripes can learn "live" at large scale and on demand.

We seek to be the 'global leader' in our segments and are looking for passionate, driven, high-energy folks, who will get us there. We are looking for **WINNERS.**

Our Founding Team:

- Siddharth Das - Former CEO, Reliance Jio Financial Technologies; M.S., Massachusetts Institute of Technology
- Rahul Dave - Former Faculty, Harvard University; Ph.D. UPenn
- Pavlos Protopapas - Director of M.S. Program in Data Science, Harvard University; Ph.D. UPenn
- Achuta Kadambi - Assistant Professor and Computer Vision leader; Ph.D. Massachusetts Institute of Technology
- Raghu Meka - Associate Professor, UCLA; Leader in computer science theory, Researcher, Microsoft; Ph.D., The University of Texas, Austin

Univ.AI is looking for a **Senior Business Analyst/Sr. Manager, CEO's** Office

About the role:
In this role, you will be responsible for business planning, modelling, business MIS, and execution strategy. You will also look after marketing and sales analytics, and strategic initiatives. You will ensure that the business is on the path to meeting its growth targets by keeping sharp focus on performance. You will help prepare pitch decks, and business presentations, and help fund-raise. You will work closely with the CEO to help manage and grow the business.

Qualifications:
Engineering degree, or MBA from a well known institution, and 1-2 years experience as a management consultant at a major consulting firm - McKinsey, BCG, Bain, Parthenon, AT Kearney, Deloitte, Accenture (or similar)

See what we are looking for below and let us know if you have what it takes.

Skills/Abilities

- You are very good with numbers and business modeling.
- You are top notch at making compelling presentations to tell a story.
- You have excellent communication skills.
- You are an effective researcher, and stay on top of competitive trends, especially market intelligence that you gather from colleagues and other sources.
- You are a constant learner, and problem solve your way out of tough spots by learning quickly, especially from competitors who are using effective means to solve similar problems.

- You have strong leadership potential, and could step into the role of a “Deputy COO” and eventually, the COO of the company.

Traits

- You are hungry for success, and have very high personal accountability.
- You are hands-on.
- You dream big, translate them into targets and set about achieving them in “small tangible increments.”
- You take criticism well and respond quickly.
- You do what it takes, and however much it takes.

What do you get

- You will be a part of the senior leadership and will work directly with the Founders and the CEO
- Creative freedom and authority to drive goals and targets provided you show a trend of consistent accomplishment

Location: Bangalore (currently remote)
Joining: Immediate

Compensation: You will receive highly competitive compensation and an opportunity to share in the upside of an early-stage start-up if you are a significant contributor and successfully achieve aggressive goals to drive the company’s growth.

If you’re looking for your next challenge and are ready to grow as a professional, send your resume and cover letter to bhavna@univ.ai.
