Curriculum Associate at iTeach Schools

Overview:

iTeach Schools is a fast-growing Teach For India alumni-led startup, focussed on providing a free, foundational, and excellent education to secondary students. Founded in 2015, we now operate nine schools from Grades V to X across Pune, in collaboration with Pune Municipal Corporation. (read about our 6 year Journey here!).

Our students hail from Pune's most under-resourced households. The secondary grades are the last laps of intervention for our students, and probably the only real chance we have left to level the playing field between them and their high-income peers.

Currently, in our seventh year, we serve 2000 students and 1350 student alumni through a strong team of nearly 170 staff members. In 2022-23 we're looking for entrepreneurial individuals who will join us as we increase our impact to 2000 students and 1350 alumni.

Role Summary

The Curriculum Associate will work with the Curriculum and Training Manager on the overall research and development of the school's curriculum. They will provide assistance to School Leaders and Teachers in its effective implementation and implementing processes for constant improvement. Given that iTeach Schools is a young start-up, we are looking for people who will be eager to design and create the most effective systems and processes, combining researched best practices with their own contextual innovation.

Key Responsibilities:

Curriculum

- Research the best possible approaches to integrating values and mindsets, exposure and access, 21st century skills, project based learning and arts
- Develop and monitor implementation strategies for the above
- Implement and drive feedback loops to constantly refine the curriculum's quality

Teacher and School Leader Support

- Assist School Leaders and Lead Teachers with feedback on planning, analysis of student data and course correction
- Observe Teachers in their classrooms and provide strong instructional feedback
- Assist the Counselling Team and define instructions for students with learning disabilities.

Assessments

- Research Standardized Assessments and identify what can work best given our school vision and

culture

- Strengthen Formative Assessments across the board - exit slips, weekly tests and unit tests as a lever to improve instruction
- Drive Institutional Learning / Knowledge Management Processes
- Facilitate sharing and implementation of best teaching practices among Subject Teams of our schools
- Document best practices and exceptional lessons, and share them with other schools and organizations in the community

Experience

- Bachelor's degree with exceptional performance as a teacher for 2 or more years
- Experience with research and project designing, and presenting demonstrable outcomes for these projects
- Experience with various Pedagogical approaches and their appropriate use

Competencies

- Exceptionally strong instructional expertise, and advanced proficiency in Classroom Planning
- Ability to conduct research independently and contextualize
- Comfortable with using large data sets and able to glean applicable insights from the data
- Excellent written and oral communication skills
- Strong instructional knowledge and expertise
- An incredibly strong work ethic, with the willingness to learn and reflect critically
