Your Autonomy & Responsibility

CRISIL Benefit

- Get trained in the CRISIL way of doing things – with independence and analytical rigour, as well as on-the-job learning
- Exposure to the leading industry areas such as Investment Research, Data Science, and various asset classes

Research Exposure

- Qualitative and quantitative ESG research covering all three tenets – E, S and G
- Company/sector analysis, ESG assessment models, framework-based analysis, etc.
- Understand various tools and techniques to systematically approach research and acquire expertise, and be prepared to formulate opinions

Global Client Exposure

- Get an opportunity to work directly with ESG and investment research teams of global investment banking/asset management majors within a few months of joining
- Interact with clients to understand their requirements and to provide nuanced output

GRAB THE OPPORTUNITY to be the first one by sending your profile to placement coordinator.
