Work with Educational Initiatives

Products & Solutions

Founded in 2001, Educational Initiatives Private Limited (EI), is South Asia's leading assessment research and educational technology organization, working with the vision to create **"a world where children everywhere are learning with understanding".** Our goal is to reach a multitude of children across different strata of society, irrespective of the kind of education they are receiving today or the curriculum they are following. With our focus in educational research, assessments, pedagogy-based personalized adaptive learning (PAL), and a Science of Learning (SoL) repository of data and techniques to help children learn better, we continue to strive to leverage the twin levers of cutting-edge educational research and a technology-based solutions approach to revolutionize how children in the K-12 education space learn.

Over the past two decades, EI has undertaken over 80+ projects with 50+ government and civil society partners (16+ languages, 40+ detailed studies published) across geographies, socio-linguistic backgrounds in India and abroad, for more than 10 million students across different grades. EI has offices in Bangalore and Ahmedabad in India, with 350+ staff members specializing on different aspects of assessments, technology, training and project management. The top executives at EI serve/have served as advisors on boards of several educational committees for State and Central Government of India.

We have worked on several large-scale systems change projects in India with Sarva Shiksha Abhiyan (SSA), Gujarat Secondary Education Board (GSEB), SCERT Haryana, Bihar Education Project Council, SSA Tamil Nadu, Municipal Corporation of Greater Mumbai (MCGM), Himachal Pradesh, Uttar Pradesh government agencies and the countries of Maldives and Bhutan. Our work has been funded by UNICEF, World Bank, United States Agency for International Development (USAID), Department for International Development (DfID) - UK, The Partnership to Strengthen Innovation and Practice in Secondary Education (PSIPSE), MacArthur Foundation, Michael & Susan Dell Foundation (MSDF), Hewlett Foundation, McKinsey, Harvard University and University of Newcastle.

The People

The key driver of EI's success is the quality of our staff. Our team includes over 300 professionals combining a unique depth of pedagogical and assessment expertise with experience from working with schools, government systems and top-tier organizations in education, and leading academic institutions. The team includes Harvard Business School (HBS), Indian Institute of Management (IIM) and Indian Institute of Technology (IIT) alumni, university rank-holders at Ph.D. and Master's Level in Science, Social Sciences and Humanities, along with teachers with several years of school experience, curriculum planners, teacher trainers, and people who have been instrumental in developing textbooks. The organization has specialized internal teams working on test development, data science, educational research, psychometrics, personalized learning, and IT development.

For the roles, ideal candidates are ones;

- who have graduated (in any stream/discipline) from top tier colleges in India and abroad have worked in similar roles or have strong interest in the roles
- who are passionate about the education reform and realize that their actions can translate into

real-life impact on the ground

- who are driven to learn and solve some of the most pressing problems to fix the education system Operating style suited to working in a small-organization setting, where teamwork and resourcefulness are highly valued
- driven to excel in every aspect of work with high level of innovation and strong perseverance Entrepreneurial spirit and 'can-do' attitude
- T-Shaped Approach: have both breadth in how to collaborate and innovate across disciplines and depth in specific areas of expertise

The Role

Our ideal candidate can form insights and find innovative ways to act on these insights, translate ideas into product designs. He/she can harness the passion and energy of teams across the company to bring these designs into the world for our customers. We are looking for a proven candidate who can help shape the vision and roadmap, define the principles and framework that allows us to build world-class products.

Job Responsibilities:

- Understand customer needs and gather product requirements
- Work with the product manager on the development of the product roadmap through conducting user research, market research, analyzing the competitive environment and understanding key product metrics.
- Collect and analyze feedback from customers, stakeholders and other teams to shape requirements, features and end products
- Work closely with the design team to create wireframes and write requirements/specifications for all new product features and additions to existing features
- Engage closely with the engineering team to help determine the best technical implementation methods as well as a reasonable implementation schedule
- Produce and review product requirements documents (PRD)
- Help track the development, assist with running our scrums

Requirements:

- Good communication skills and ability to articulate your vision well
- Ability to influence people who don't directly report to you
- A customer-centric approach to designing and building products
- Strong analytical reasoning skills and a bias toward data-driven decision-making, combined with solid business judgment.
- Inquisitive and engages in continuous learning
