Elchemy

Job Profile: **International Business Development**

About the Company:

Elchemy is a tech-enabled chemicals distribution company solving supply chain challenges by taking a software-first approach. It was founded in the latter half of 2021 in the backdrop of global supply chain shocks induced due to the pandemic making the opportunity ripe for disruption. The founders of the company are alumni of IIT-B, IIT-D, and IIM-A, and have previously worked at places like Amazon, Samsung, P&G, and SRF. Within just 2 months of launch, the company secured $2M in pre-seed funding from marquee VCs and angel investors, including promoters of some of the publicly listed chemical companies.

Elchemy is revolutionizing the $50Bn chemicals export industry, we're determined to change how trade happens in this industry - the opportunity is huge & possibilities are endless. We're building a strong team of young, smart, & enthusiastic folks who have a bias for action. Those who keep passion & commitment at their core. Who is the right fit? - Folks who have always wanted to build/run their own business or folks who want to see the 0-1 journey closely or folks who can handle responsibilities & challenges by taking ownership. We are defined by our fun, flexible & reliable culture & are keen on building a workplace that is healthy for our team in all aspects. If you feel you are the right candidate, run your eyes through the roles and responsibilities below:

Roles and Responsibilities:

- Generate new business opportunities for Elchemy's products & services for global markets, including, but not limited to, the US, EU, Middle East etc.
- Generate high-quality leads by employing methods like cold-calling, cold-emailing, attending physical & virtual conferences, social media outreach etc.
- Set ambitious revenue targets, work with cross-functional teams to over-deliver
- Understand company's value proposition & present it to potential customers
- Negotiate long-term contracts with (& act as an advisor to) strategic accounts
- Develop proposals & presentations for new business opportunities & deals
- Manage existing customers & sales pipelines to explore upsell opportunities
- Identify trends & conduct research in chemical industry to build intelligence

Elchemy

- **Skills and Qualifications:**
  - 2-5 years' experience in Sales/Business Development in fast-moving company
  - Should have an excellent verbal/oral communication & presentation skills
  - Should have been in the customer facing roles with high responsibility in past
  - Should have ability to engage with C-level executives & decision-makers
  - Should have an excellent proficiency with Microsoft Excel, PowerPoint
  - Past experience in B2B field or International Business Development is a plus
  - An educational background in international business or an MBA is preferred
  - Should have an ability to work in high-energy, fast-paced cross-functional teams
  - Should have an entrepreneurial bent of mind, strong business acumen, good network, can commit & take ownership; should have high EQ

- **What You Get:**
  - Hands-on experience at a well-funded & fast-growing company
  - Work side by side with founders & get as much responsibility as you can take. You are the limit!
  - Huge scope for professional growth as company expands globally
  - Responsibility, ownership & ability to build the team

- **Working Days:** 5 (Saturdays and Sundays off)

- **Location:** In-office (Andheri, Mumbai, right next to the Western Express Highway Metro Station). The industry demands is niche, nuanced & complicated - therefore a lot of learning and unlearning happens in the office just through mere osmosis. Working from office also increases collaboration, keeps the environment fun, & helps build stronger bonds between the early team.
