Are you the one we are looking for?

Inviting applications for the role of **Product Owner - Transform**

Transform is the most dynamic stage of the Genome B-I-T-S (Because – Immerse - Transfrom- Solidify) wave providing live and asynchronous learning events for thousand of Genome users each day. You will have a real impact in these experiences through working across different teams—engineers, operations, and product design.

Responsibilities

- In-depth knowledge of the product and empathy for its users
- Get feedback from users and stakeholder on prototypes, features, etc.
- Apply design thinking to both technical and operational problems
- Work with Product Manager to define the scope for the sprint, contribute to a backlog for continuous product improvement.
- Own each Sprint: planning on a dev ops board, PBI refinement so tasks are clear, achieve definition of done, and demonstrate value delivered to Learners
- Support testing by writing user stories and test plans
- Maintain priorities and remove impediments
- Present the project status reports to internal leadership
- Maintain collaboration and energy within sprint team using Agile ceremonies
- Ability to switch between various ways of work to facilitate projects with a cross functional team
- Fluent in using collaboration tools – MS teams, PowerPoint, and Zoom in particular

Preferred skills

- Knowledge and experience in Agile methodologies
- Experience using agile tools such as Jira or Azure Dev Ops
- Genome experience in Design Thinking
- Strong attention to detail
- Good written communication
- Comfort with ambiguity
- Comfort working in a remote environment and collaborating asynchronously
- Interest in HR systems and capability frameworks
