Research Analyst

Global Trade Observer is seeking a detail oriented and self-motivated **research analyst** to carry out research, data analysis, data visualization, and report writing relevant to the ongoing projects of the organisation.

GTO is an independent, non-partisan, data-driven, social impact venture. It aims to be a trusted knowledge partner for trade policymaking and ensure India leverages its trade potential to become a $5 trillion economy.

The role is a full-time position based in New Delhi.

Responsibilities:

- Work with the core teams to execute projects
- Create content on India's district, state and international trade engagement
- Support data collection, documentation, and analysis
- Undertake research in defined areas of work
- Collaborate with communication teams to support outreach efforts
- Provide administrative and organisational assistance on GTO projects and events

Qualifications:

- Bachelors / Masters in Public Policy, Economics, International Trade, or related domain with 0-3 years' of work experience
- Knowledge of key trade trends, and a keen interest in pursuing a career in trade/public policy/global affairs
- Familiarity with quantitative and qualitative research methodology and tools
- Detail-oriented approach along with critical analysis skills
- Market and Trade policy research
- Technical regulatory research for India and foreign markets
- Data analysis and data visualization
- Producing comprehensive research reports

Personal attributes:

- **Interpersonal skills:** Ability to work with different kinds of people at different levels of seniority, ability to collaborate
- **Research aptitude** – Ability to diligently seek out all information needed to thoroughly run a research question to ground
- **Strong written communications skills** – Ability to convey complex or technical information in an accurate, concise, and understandable way through narrative text and data presentation
- **Innovation:** Ability to brainstorm and ideate (projects and processes)
- **Accountability:** A strong sense of work ethic, and the willingness to be held responsible for tasks assigned
- **Literacy in Microsoft Word, PowerPoint, Excel** and other standard applications is required. Familiarity with Power BI or statistical software is a plus.
- Time-management skills
- Knack for problem-solving and willingness to learn

GTO is an equal opportunity employer and considers all applicants without regard to race, religious belief, gender, marital status or physical disability.
