INDUS INSIGHTS

Gurgaon | Los Angeles | Wilmington

COMPANY OVERVIEW FOR CANDIDATES

We are delighted about your interest in Indus Insights and look forward to speaking to you soon. In the meantime, here are some of the key pieces of information about us.

1. **Overview**
    a. Professional Services Firm, providing Data Science & Advanced Analytics services to Organizations
    b. Focused on Financial Services sector
    c. Global clients; Most of them in the US
    d. ~75 people, All Star team; One of the highest caliber analytics teams in India
    e. Growing at 50-75% year-on-year for the last three years; Profitable for 3+ years
    f. Founding team has experience at Bain & Co, Capital One, Citibank, Discover

2. **Clients**
    a. Most Clients are in the US. Some clients also in UAE, India, Vietnam, Australia
    b. Most Clients are in the BFSI (Banking, Financial Services, Insurance) sector. Few also in other sectors – E-commerce, airlines, etc
    c. Clients vary in size and growth rates. Mix of Fortune 100 firms, Fortune 100 firms, and fast growing fintech & insuretech challengers
    d. Clients tend to be much more fast paced and innovative as compared to usual clients of Analytical Services companies
    e. Nearly all relationships are annual retainers – we rarely work in a project-by-project setup with Clients

3. **Our Work**
    a. **What we do:**
        i. <u>Sophisticated Data Science</u>
            1. ~45% of our work
            2. Sophisticated statistical models, machine learning algorithms, millions of data points, thousands of variables, etc
            (This isn't simple regression developed in Excel)

ii. Development of Data & Econometrics Based Strategies
    1. ~45% of our work
    2. This is the "So What" of building the models mentioned above. It involves doing P&L analysis, building econometric models (NPV/LTV models, etc), performing impact sizing, sensitivity analysis, comparison of marginal profitability, presenting findings, convincing stakeholders, etc
    3. Takes the form of developing Credit Policy, Pricing Strategy, Direct Mail Strategy, etc

iii. Dashboarding
    1. ~10% of our work
    2. We set these up and hand these over to our Clients
    3. Only done when part of a broader client relationship

b. We do **not** split our roles across the above. We are big on ensuring variety of work. Everyone at Indus gets to work on all the above areas and is expected to

c. What we don't do:

i. Only Dashboarding
ii. Data Engineering (setting up databases, ensuring data quality, etc)
iii. Traditional Management Consulting and Related Services (market research, org restructuring, compensation design, IT strategy, etc)

d. Typical Functional Areas of Focus

i. Credit Risk, Fraud, Collections: Key expertise area. 50% of our work
ii. Customer Acquisition: ~25% of our work
iii. Existing Customer/Portfolio Strategies: ~25% of our work

Case studies on each of the above areas are available on our website (http://www.indusinsights.com/clients-services/case-studies/)

4. People and Culture

a. We are proud of the high caliber team that we have built. Nearly everyone in India is a graduate of the Top IITs (Bombay, Delhi, Kanpur, Madras, Kanpur, Kharagpur, Roorkee) or BITS Pilani or the most competitive Economics / MBA programs (SRCC, LSR, ISB)

b. Our Culture can be best described as:
"We take our work very seriously. We don't take ourselves very seriously"

c. Some of the key values that are important to us:
Curiosity, Ownership, Excellence, Humility, Team Spirit, Continuous Improvement

5. Why should you work at Indus

a. Superb Peers. Enjoy working with them, be inspired by them, learn from them
b. Exciting, Intellectually Challenging work
c. Work in some of the hottest trends: AI/ML and Fintech + InsureTech
d. Great variety of work. We have a policy of rotating people across clients and functional areas so that they get a well-rounded experience
e. Fast paced, innovation focused environment
f. Great Exposure: To CXOs, to how decisions get made, to working with clients across the globe, to significant responsibilities very early in your career

6. **What our People say about us:**
(Collected through anonymous survey in May '20. Participation > 70%)
(Rating Scale: 1 = Strongly Disagree; 5 = Strongly Agree)

a. *"I am excited about being at Indus"* : **4.2**
b. *"I trust Indus leadership"* : **4.5**

7. But we aren't for everyone

a. <u>We aren't a 9-5 company</u>
While we don't track hours people work, our responsibilities require ~10 hours of work on an average day. There might be 0.5 day of weekend work in a month on an average, depending upon project milestone coming up. Like other top tier consulting firms, ours is also not a "chill" job. But the learning is also at 3-5x the rate of "usual" firms

b. <u>Managers need to travel</u>
Managers need to spend time alongside our clients, present key findings, get stakeholders to align, brainstorm other initiatives, etc. This takes the shape of 7-10 days being on site at the Client's office every other month. If you don't want to travel at all, then Indus wouldn't be a good fit

c. <u>Not Modeling Only</u>
As mentioned above, we want people to be good at Data Science and also at developing Business Strategies from those predictive models. If you are interested in only one of the two, then Indus wouldn't be a good fit

8. **Roles and Responsibilities: Our Tiers and their Responsibilities –**

Tier	Description
Director	• Usually 10+ years of experience • Industry and Subject Matter Experts • Managers of Managers • Key Responsibilities: ○ Ensure we add amazing value to our Clients ○ Help win new Clients ○ Nurture the culture of Indus
