Sr.Territory Sales Manager

- Remote, India

Overview

Impact the Moment!

It is a powerful feeling knowing that the work you do every day contributes to the lives of learners and educators around the world. Do you want to contribute to something bigger? If your answer is yes, then we want to talk to you.

How can you make an Impact?

The main responsibility of this position (SR. TSM) would be to call on the assigned institutes in a defined territory (geography) and promote the Test prep products – Print & Digital Solutions.

This position would also be required to cover the retail sales channel to ensure that the demand that is generated from the colleges/institutes can be fulfilled. Reporting of the work done in the assigned territory needs to be accomplished via our CRM tool – salesforce.com.

What can you expect from the position?

1. Develop in-depth knowledge of MHE Test prep products, and utilize this knowledge to successfuly sell MHE products and learning solutions to new and existing cutomers in assigned territory.

2. Budget management in a competitive, fast-paced, and highly dynamic environment. Achieve goals and manage the sales process, ensuring delivery against key performance metrics with a strong emphasis on new business.

3. Managing the sales demand generation exercise and responding to inbound inquiries from product, marketing and lead generation programs.

4. Engage with prospect organizations to position MHE solutions through strategic value-based selling, business case definition, analysis, references and analyst data.

5. Develope effective strategies for engaging with potential customers

What can you bring to the role?

- Bachelors' Degree is mandatory, preferred to have master’s in marketing.
- 5- 8 years of relevant experience in Sales preferably in the education industry (Test prep segment)
- Ability to travel within assigned territory (50% -70%)
- Proven success in growing market share and revenue.
- Experience in developing business plans and market opportunities.
- Strong market research and analytical skills
- Ability to problem solve across a wide range of stakeholders
