Organisation: Meraki SparX (Parent Company: www.merakilabs.com)
Role: Researcher (Indian Economy and Public Policy)
Location: Bangalore (Full time)

About Meraki SparX

At Meraki SparX, we create deeply researched and innovative content across long form writing, audio, and video platforms, designed to amplify and scale human potential. With a focus on themes of politics, economy, development, health, entrepreneurship and others, Meraki SparX aims to make knowledge accessible for an Indian audience and to equip them with tools to catalyse growth. We are passionate about producing meaningful content across a range of disciplines that leverages the power of science, humanities, and technology to enable people to create and experience lasting exponential impact in their lives.

Job Overview

The Meraki Sparx Researcher will be able to identify reliable sources of credible information across subject areas and to distil key data points. The ideal applicant will be comfortable with analysing academic and scientific research papers, synthesising and summarising data for use across our content platforms. They will be able to stay up to date with the most current and cutting-edge studies within various topic areas, and have excellent research, writing and organisational skills.

If you're passionate about deep research, creating meaningful content, helping to amplify and scale human potential and building outstanding digital products with an audience-centric approach - we'd love to talk to you.

Key Responsibilities

- Conducting Primary and Secondary research on themes of Indian Politics and Economy, Public Policy, and Developmental Economics
- Identifying, analysing, and presenting relevant research papers and books ● Providing inputs into creation of data-backed narratives
- Working closely with the research team in the drafting of briefs, synthesis, blogs etc.

Essential Qualifications

- Master's degree in Economics/Public Policy
- For exceptional students without a master's degree, the role is open as an internship with the possibility of a full time offer
- Solid Analytical and Research skills, with an understanding of qualitative and quantitative research methods
- Excellent writing and presentation skills

- Ability to conduct independent research

Desired Qualifications

- Knowledge of publicly available data sources like NSS, NFHS etc. ● Programming skills in either STATA, R, or Python
- Candidates pursuing their doctoral degrees are encouraged to apply with the possibility of part time work.

Remuneration will be between 6-12 LPA, depending upon a candidate's experience level.
