Center for Thinking, Language and Communication

At CTLC, we believe that the key to breakthrough value creation and innovation lies in developing a deep understanding and mastery of thinking, language, and communication. We engage in cutting-edge research and education at the intersection of technology and these 3 fundamental pillars. In a world where the boundaries between human and machine blur, this quest has never been more vital. As part of Plaksha University's visionary mission to create a world-class institution dedicated to advancing science and technology for the betterment of humanity, CTLC is at the forefront of groundbreaking research that challenges what we know and pushes beyond the boundaries of possibility.

Position: stemX Fellow, CTLC

Within its first year, CTLC has delivered courses for Undergraduates, post-graduates and pHD scholars at Plaksha University. The vertical within CTLC that focuses on this is called stemX. Over the next few years, CTLC will dramatically expand its course offerings within Plaksha and beyond. As a stemX fellow, you will be working on multiple educational programs offered by CTLC and will report to the Education Experiences Lead. You will be involved in the various stages of course development right from curriculum design to instructional design and assessments.

Your main responsibilities will include research for course content and pedagogy, instructional design tailored to course content, course logistics, facilitating workshops and tutorial sessions, and managing assessments and evaluations. You will collaborate closely with stakeholders across the organization, including our research team, students, subject matter experts and tutors to ensure that all content and materials are aligned with best practices and meet the needs of learners at all levels. To succeed in this role, you should have a curiosity for science and technology, passion for education, excellent project management skills, and experience as an adult educator.

This is a fixed term role of 1yr extendable by another 1yr. It is ideal for someone looking to gain the right holistic experience before applying for a pHD or building a career as a university administrator. A total of 3 stemX fellows will be hired for the academic year 2023-24.

Key Objectives and Responsibilities:

- Research to support curriculum development for existing and upcoming courses.
- Documentation and knowledge management of all courses for all stages from curriculum to classroom sessions to assignments and assessments.
- Coordinating and managing a pool of tutors.
- Building a community of guest lecturers and visiting faculty who can add value to CTLC's course offerings.
- Ensure that courses run smoothly are serving the needs of industry and academia.
- Build and maintain relationships with key stakeholders including faculty, industry experts, and students.
- Fulfilling all the LMS responsibilities and requirements of the university
- Classroom management

Desired Skills and Experience:

- Ability to do academic research on any course related theme
- Experience with pedagogy and curriculum development.
- Experience as an educator with adult students either at the undergraduate or postgraduate level.
- Experience and skill in conducting one-one and group tutorials.
- Passionate about the intellectual life and teaching
- Create state of the art lesson plans and teaching session PPT presentations that fulfills all of the learning objectives and outcomes
- Excellent communication skills to collaborate effectively with other departments, partners and stakeholders.
- Ability to synthesize complex research into key relevant insights.
- Highly organized and can manage multiple projects simultaneously.
- Strong interpersonal and relationships building skills.
