# Assistant Product Manager

Job Description:
Role: Assistant Product Manager
Job Location: New Delhi
Experience: 2+ years
Early joiners preferred

**Job Description**
This role is for the APM equipped with a bent for solving technical problems and an equally strong ability to drive business strategy and communicate to any audience.

You will be responsible for working closely with cross-functional teams to build and launch important new products and features for users who engage daily on our apps. You will collaborate with engineers, designers, researchers, and analysts during the entire product lifecycle.

You will manage core parts of the Content experience on Rooter, with a focus on building an engaging community for sports fans in India and around the world. Your roadmap will include work ranging from developer productivity tools development to user research on how sports fans think about content creation & consumption to design sprints on how to communicate our value proposition to new users. You will be an expert in Rooter's Content dynamics, and people will lean on you for understanding the complex effects of product changes we make. Because the work you do is so central to the Rooter's product, you will be expected to serve as a thought leader championing cross-team initiatives.

**What can you expect?**

- Create buy-in for the product vision both internally and with key external partners
- Translate product strategy into detailed requirements and prototypes
- Scope and prioritize activities based on business and customer impact
- Work closely with engineering teams to deliver with quick time-to-market and optimal resources
- Guide large parts of the organisation through making difficult tradeoffs

**Key Skills**

- 2+ years of experience
- 1+ years of experience with B2C content apps
- Consumer understanding of India's Vernacular, Tier II/III user
- BE/B.Tech in a technical/analytical field, such as computer science, math, statistics, or economics
- Ability to quickly absorb technical concepts and communicate them to a non-technical audience
- Strong knowledge of SQL and Python
- Ability to pull data using basic SQL queries and ask the right questions of data

- Gain a deep understanding of customer experience, identify and fill product gaps and generate new ideas that grow market share, improve customer experience and drive growth
- Strong execution mentality. Can envision a world different than the status quo with the ability to articulate a clear path to get there
- Strong analytical thinker
- Experience in data-driven testing

**Qualification:**

- B.E./B.Tech technical/analytical field, such as computer science, math, statistics, or economics

**About Rooter**

Rooter is India's leading Game and Esports Streaming platform. With more than 450 mn gamers playing games like Call of Duty, Minecraft, etc, India is one of the largest mobile gaming markets in the world.

Rooter, considered the "Twitch of India" has managed to create a strong leadership position with more than 39 mn downloads with 10 mn monthly active users and 1 mn daily active users. Rooter works closely with top esports teams and esports tournament organizers providing exclusive gaming content to its users. We also work with more than 10,000 professional streamers and our unique UGC features have led to 1 mn users creating content on the Rooter app every month. We are the no.1 app in the Sports category on Google Playstore in India since Oct 2020.
We recently announced a $25 mn Series A funding with investors like Lightbox, March Capital, Duane Park Ventures, Advantage, Paytm, Goal Ventures, and IeAD. Rooter has grown to now an 100+ members team who are working towards building the future of gaming in India.

Gaming is going to be the focal point of Metaverse and we look forward to having you with us as we lead that revolution in India and the rest of the world.
