Sai Shikō
Science and Practice of Well Being

Sai Shiko™ is an online and off-line learning studio for building future skills in students by working with schools and students.

What are future skills?

1) Critical thinking

2) Problem solving

3) Emotional intelligence

4) Collaboration

5) First Principles Thinking

6) Communication

7) Debating

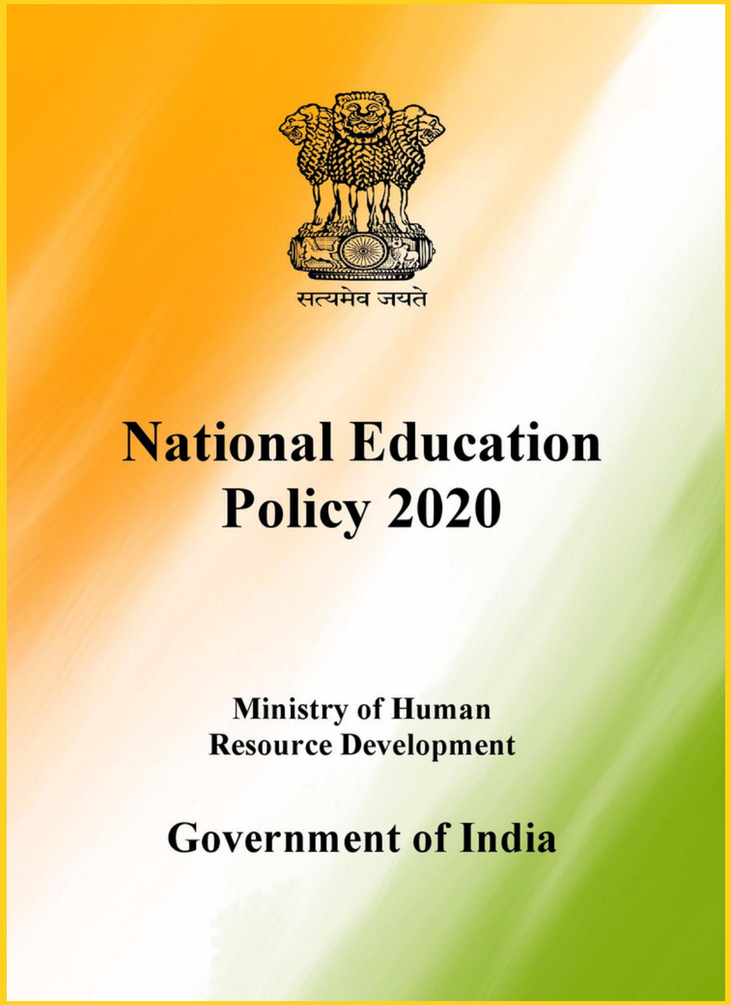

8) Well-being

Ira Gupta
Head of Human Resources, Microsoft India

In the world in which our younger generations are growing up today, focus on inter-personal skills, emotional intelligence, resilience and grit, along with well-being and optimism, will give them much needed skillsets and mindsets as they prepare to navigate the world as adults. Your curriculum, with its focus on social and emotional learning, will be such a wonderful learning opportunity to prepare them for success. I wish I had gone through it growing up!

These skills have been prescribed by NEP 2020

Education Policy lays particular emphasis on the development of the creative potential of each individual. It is based on the principle that education must develop not only cognitive capacities - both the 'foundational capacities 'of literacy and numeracy and 'higher-order' cognitive capacities, such as critical thinking and problem solving – but also social, ethical, and emotional capacities and dispositions.

teamwork, and cooperation. The overall aim of ECCE will be to attain optimal outcomes in the domains of: physical and motor development, cognitive development, socio-emotional-ethical development, cultural/artistic development, and the development of communication and early language, literacy, and numeracy.

11.3. A holistic and multidisciplinary education would aim to develop all capacities of human beings -intellectual, aesthetic, social, physical, emotional, and moral in an integrated manner. Such an education will help develop well-rounded individuals that possess critical 21st century capacities in fields across the arts, humanities, languages, sciences, social sciences, and professional, technical, and vocational fields; an ethic of social engagement; soft skills, such as communication, discussion and debate; and rigorous specialization in a chosen field or fields. Such a holistic education shall be, in the long term, the approach of all undergraduate programmes, including those in professional, technical, and vocational disciplines.

abilities in individuals and increase individual happiness. The happiness/well-being, cognitive development, and cultural identity of individuals are important reasons that Indian arts of all kinds must be offered to students at all levels of education, starting with early childhood care and education.

How do we build them?

Core offerings:

1. Teacher Training and Capacity Building.
2. Future Skills Training for Students 10-18 years

What parents are saying about Sai Shiko

"It was just one of those days that I found myself overwhelmed and my emotions all over the place. My son Vivan, who is 11, took me by surprise when he pointed out the importance of calming down and responding rather than reacting. Not just that he shared 5 coping strategies he had learnt during his Sai Shiko sessions. I'm really glad he attended the Sai Shiko workshop..."

Neha Goel
Sai Shiko Parent

"Sai Shiko is an enhancement program that enables young minds to comprehend and grapple with their emotions. It provides tools to the kids who are able to apply these in their daily life routines while dealing with the various upheaval of feelings. I'm so grateful to the mentors who help my daughter apply these tools and enable her to reflect upon them in her daily environment."

Sonali Bhatia
Sai Shiko Parent

What learners are saying about Sai Shiko

“

To me, Sai Shiko is trying again and not giving up. I always felt there was a missing piece in me but with this program, I could put myself together. It really helped me to understand the importance of resilience and dealing with my emotions...I will continue to use the tools to further better myself.

Science and Practice of Well Being

Feedback from Teachers from The Shri Ram School for our Growth Mindset workshop

It was the most fruitful and enjoyable and relatable session that I have attended till date.

Amrita Chandra

The manner in which you repeatedly attempted to draw home important messages through discussions, sharing experiences and concerns, playing quizzes and games. The neuroscience of learning is an essential tool for teachers today, so that was exciting.

Vidhupriya

The scientific evidence to support your proposals, also the breaks with fun games and polls.

Rimjhim

The way it was structured. There was a definite flow and it was very well presented by Deepti and Vinati. It made me definitely sit back, think and recalibrate my approach.
