Product Management Associate

We are looking to onboard a professional for a product management function in Gurgaon. The person will play a lead role in product planning and product marketing. Responsibilities will include analysing and prioritising product and customer requirements, tracking product performance and fit with product vision, and working closely with delivery and technology teams to design and deliver the proposition, uncover new needs, and drive priority initiatives. This is an excellent opportunity to learn business leadership skills, work closely with the founders to support the company's overall strategy and goals and work with sales, marketing, and operations to meet revenue and customer satisfaction goals.

We pride ourselves in being India's leading organisation serving the senior market. Samarth provides comprehensive care to elders in 90+ cities to help them lead an independent life and nurtures the largest community of educated seniors in more than 100 cities; Our clients include the diaspora in 30+ countries. We drive research, policy advocacy, consulting organisations and government to create better products and solutions for the elderly.

Qualifications

- Postgraduate qualifications or graduates with 1 to 3 years of experience in external-facing roles
- Excellent written and verbal communication skills in English
- Strong analytical and problem-solving skills
- Proficient with MS Office, internet and social media tools
- Quick learners and want to excel in a dynamic environment
- Familiarity and interest in visual communication, media and working with data would be a plus.

We offer competitive compensation and opportunities to fast-track professional growth.
