Job Opening - Lead Data Scientist

Job Brief

We are looking for a Data Scientist which is a **full-time position and based in Hyderabad/Mumbai, India** to analyze large data sets to find patterns and develop actionable insights. You will be responsible to build holistic data products to extract valuable business Insights. In this role, you would be working on analysis of Electoral Data, Geo-spatial data, Survey Analysis, Behaviour & Sentiment Analysis and identify the key focus areas thereby improving the campaign efficiency. Your goal will be to help our company analyze trends to make better decisions.

What We Are Looking for In You?

- Ability to Extract, Transform & Load (ETL) from multiple data sources and automate collection processes
- Design advanced algorithms to gain actionable insights and boost the productivity of the campaign
- Build predictive models and machine-learning algorithms and combine them through Ensemble Modeling Techniques in order to improve the accuracy of the surveys
- Present information using data visualization techniques & propose solutions and strategies and maintain organizational data quality

Required Qualifications

- Graduate / Post Graduate in Statistics/Mathematics/Economics/Engineering or equivalent analytical discipline from Tier 1 institutes
- Min 3+ years of work experience as a Data Scientist and use of statistical methodologies
- Min 3+ years of work experience in Data Mining and familiar with Optimization recommendations along with neural networks, clustering & Regression
- Ability to apply ML & AI modeling techniques to gain actionable business insights and boost campaign productivity
- Strong knowledge of **R, SQL, Scala and Python** & experience using Business Intelligence tools (e.g. Tableau/Power BI)
- Strong knowledge of the sampling, selection biases, and normalization techniques
- Excellent communication and presentation skills so that insights can be conveyed to a non expert audience

Preferred Qualifications

- Previous work experience in any political consulting domain will be a deal breaker
- Experience of ERD (Entity Relationship Diagram) and database design
- Experience in designing and developing NLP applications for Sentiment Analysis(or opinion mining)
- Knowledge of Full Stack Web framework (Django & Flask)

Who are we?

We are an elite team of India's most innovative professionals that help politicians and political parties solve their short and long-term campaign challenges with data, research and design-based thinking. Our past work includes building wildly successful organizations, driving large scale campaigns in the remotest parts of India, and solving highly challenging problems. We are currently one of India's fastest-growing startups.
