Swaniti Initiative

Job Description

Position: Associate

Location: New Delhi

Reporting To: State Program Manager

Remuneration: 6 LPA to 7.2 LPA

Who are we?

Swaniti Initiative is a decade-old organization working in the space of policy-making and public service delivery. Our projects have been focused on supporting the government administration in strategizing scheme implementation, providing research support to Hon'ble Members of Parliament, and developing data-technology tools. With flagship initiatives like Supporting Parliamentarians in Analysis and Research in Constituencies (SPARC) and Leadership and Engagement Associate in District (LEAD), Swaniti has supported Constituency Development and District Development Planning in various parts of the country. At present, along with working with 100+ Hon'ble Members of Parliamentarians for policy-making, we are working with several state and district governments providing technical assistance to ensure the delivery of schemes to the last mile. Major verticals of our work are Climate and Sustainability, Social Protection, Policy Engagements, Technology, and Rural Livelihood & Governance.

What you'll work on?

Swaniti Initiative in collaboration with several civil society organizations will be providing technical assistance to multiple State Governments to mitigate the effects of climate change on the vulnerable sections. This is envisioned to be done by strengthening the existing schemes and programs implemented by the State that significantly contribute toward climate change mitigation. The larger vision of the program also looks at how to develop the Indian States as leaders in renewable energy production and consumption while helping the States gradually strengthen their urban infrastructure planning and rural livelihoods. This is in line with the sustainable development goal and helping India meet its commitment to being carbon neutral in the next 50 years.

What will be your roles and responsibilities?

- The Associate is expected to develop insights by collecting and analysing data from the field research and assist in formulating a corresponding strategy for the execution of the action plan regarding the aforementioned targets.
- Work with the district administration on strategic planning, solution designing, and execution of the same in partnership with the line departments.
- To develop insight papers for government agencies, partnering organizations, and the funding organization, especially on the best practices, scopes, and gaps in the transition of the district and state from a fossil fuel-run economy to a green economy.
- Act as a catalyst for the departments of the state government at the state or the district level
- Represent the organization on relevant platforms.

What does the ideal candidate look like?

Swaniti Initiative is looking for an enthusiastic and curious professional, who is eager to contribute to the government system by providing research inputs and helping reengineer the schemes and programs that contribute toward mitigating changing climatic conditions. The work will be focused on need assessment, situation analysis, data analysis, brainstorming with relevant stakeholders, and collaboration with the allied departments of the State Government. The associate will be expected to make focused interventions at the parliamentary constituency/district level by working directly with a Parliamentarian and/or a Collector. S/he will be acting as a resource person for the project team, office of the MP, and several departments of the government at the state and district level and will report directly to the Project Manager of Swaniti Initiative. The position provides a tremendous opportunity to get exposure to multiple domains while working with the allied departments of the government.

Qualifications:

- Masters in subjects like Urban planning, Sustainable development, Planning and Architecture, Public Policy, Rural Development/Statistics, Public Policy, and Governance, etc.
- At least 2 years of work experience with a minimum of 1 year of prior working experience in integrated projects of mitigating issues of climate change/fossil energy etc.
- Work experience on projects focused on energy transition, green livelihood generation, or climate change with state government, union ministry MoHUA, or municipal corporations.
- Excellent communication skills and writing abilities to draft policy memos, proposals and project reports, etc.

Essential Skills and Attributes:

- Ability to liaison with government officials & departments
- Demonstrated ability to work in teams
- Critical- thinking ability
- Problem-Solving skills
- Proficiency in Microsoft office Suite
- Documentation skills
- Presentation skill

What are we offering?
