Swaniti Initiative

Job Description

Position: Project Manager (PM)

Location: New Delhi

Vertical: Rural Livelihood and Governance

Reporting to: Program Manager

Remuneration: Consolidated INR 8 LPA to 12 LPA

Who are we?

Swaniti Initiative aims to strengthen public service delivery by working with state and local governments across South Asia with a strong focus on India. Our interventions have included strengthening scheme implementation by identifying current gaps and limitations, providing research support to Hon'ble Members of Parliament about best practices in moving forward, and developing data-technology tools that can back decision-making processes. With flagship initiatives like Supporting Parliamentarians in Analysis and Research in Constituencies (SPARC) and Leadership and Engagement Associate in District (LEAD), Swaniti has supported constituency development and district development planning in various parts of the country. At present, along with working with 200+ Hon'ble Members of Parliamentarians for policy making, are working as advisors to state governments as advisors to ensure the delivery of schemes to the last mile. Major verticals of our work are climate and sustainability, social protection, and livelihood.

What will be your roles and responsibilities?

Stakeholder Relationship Management and Team Building

- PM will represent Swaniti Initiative at different levels of government and function in coordination with the Senior Management
- Identify key high-impact projects that will result in significant improvements in the life of those at the last mile.
- Design proposals, project charters, and action plans to achieve intended outcomes
- Put in place an appropriate monitoring system to assess how ongoing projects are improving the quality of life of citizens.

- Build and maintain effective relationships with strategic authorities of the government to provide them with appropriate reporting of ongoing programs.
- Respond to any needs of the administration, including providing them with innovative ideas about incoming programs.
- Establish consistent communication networks with all external and internal stakeholders for immediate course correction measures
- Document the findings and the best practices and present at various platforms
- Building a motivated and skilled team at the district level and managing the same through constructive interventions

Institutionalising Systemic Changes

- The PM will be expected to function as a resource person to the stakeholders/partners and come up with recommendations that may support the government/partnering agencies in initiating and institutionalizing required structural changes.

Project Planning, Implementation, monitoring, and Evaluation

- Conceptualize a wide range of impactful projects and implement the same for the achievement of the goals at the district level.
- Collaborate with different verticals of Swaniti Initiative in formulating, strategizing, implementing, and evaluating action research projects
- Develop an impact evaluation matrix for the projects to ensure appropriate monitoring of the program.
- Work with the Core team to identify innovative programs and projects.

Reporting, Communication, and travel

- The PM will function in close coordination with the Program Manager or Vertical Lead, Swaniti Initiative
- Since the projects may require the person to be physically available in the state, the PM may be required to travel to the project location frequently or may require relocating to the project location after completion of the design and launch phases of the project.

What does an ideal candidate look like?

We are looking for a passionate and experienced professional who is keen on taking up a leadership role in the development sector. The Project Manager (PM) shall represent Swaniti and will lead a team

working in close coordination with the government for goals like good governance, institutional reforms, unemployment reduction, livelihood generation, improving educational outcomes, ensuring healthcare delivery, and poverty reduction. The Program manager would have quantifiable targets on how to deploy and manage programs most effectively. The key role of leading the Project team would be to strategically identify projects and ensure the appropriate monitoring and impact assessment. The PM will also have to demonstrate an ability to manage a team effectively. With the support of the team, the PM would be expected to formulate and implement an end-to-end strategy, while maintaining a consistent liaison with the stakeholders.

Qualifications

- Postgraduate degree in any field with a preference for those possessing a degree in governance, economics, public policy, rural development, management, or public administration.
- Minimum 4 years of work experience in the development sector. Preference is given to candidates possessing experience in team management in projects with the government.
- At least 1 year of experience working in a leadership position where a team size was bigger than 4 members

Essential Skills and Attributes:

- Leadership Skill
- Team Management
- Strategic Planning
- Project Management
- Documentation
- Ability to Liaison with government and other stakeholders
- English Communication – Proficiency in Verbal and Written
- Proficiency in Microsoft Office suite
- Efficiency in using Google Drive & Survey Forms
