Job Title: Research Analyst
Job Location: Bangalore, Karnataka
Job Type: Full time

The Takshashila Institution

The Takshashila Institution is an independent centre for research and education in public policy. We are a multidisciplinary think tank, graduate school of public policy and a policy media organisation rolled into one. We stand for a strong Indian Republic and are advocates of the constitutional values of freedom, openness, tolerance, pluralism, and responsible citizenship. We are independent, non-partisan, and opinionated.

Job Description:

If you are interested to work on India's emerging challenges in the company of intelligent people from various backgrounds, you should apply. We don't care so much about your grades and paper qualifications as much as your curiosity, ability to learn, and to be passionate about transforming India.

You will be asked to carry out policy research, independently and as part of a team, teach economic reasoning to graduate students and to engage in public discourse on social media, podcasts, and publications. If you have other talents – non-academic, cultural, culinary, artistic, technical, sports, etc – all the better.

We prefer that you have a good background in economics or a related discipline, but we have found that engineers, doctors, soldiers, lawyers & actors do pretty well in this job too. If you apply, impress us with your talents and accomplishments of whatever kind you may possess.

Apply if you want to do something awesome, unusual and exciting. We don't like the normal and boring type.

Roles and Responsibilities:

- Continuously refine and update the economics curriculum and find new and interesting pedagogical tools (new technology, evaluation and assessment mechanisms, games, case methods, etc).
- Contribute towards making Takshashila's programmes an awesome learning experience for the students.
- Tutorials, jockeying & finally doing independent webinars

- Contribute to some of Takshashila's ongoing research projects in economics and public policy, such as *complexity economics* and *20 million jobs*.
- Identify and carry out new research projects in the same area in alignment with Takshashila's research interests and produce discussion documents and policy briefs.
- Contribute to the dissemination of research publications and ideas – write op-eds, record podcasts, organise conferences and roundtables.

Eligibility:

- A Master's degree in economics, public policy, or a related field is an advantage. That said, as long as you can make a good case for yourself in the role, your degree is not the most important factor. We have colleagues who studied a wide range of fields in college and grad school!
- Demonstrable inclination to teach is necessary. Strong interpersonal skills are required to effectively deliver the educational programmes.
- Strong analytical and economic reasoning skills are necessary.
- Ability to communicate clearly and effectively, particularly in writing, is necessary.
- Proficiency with following tools / software will be an advantage: Microsoft Office Suite (Excel, Powerpoint & Word) or equivalent software.
- Graduates of Takshashila's GCPP / PGP will have an advantage.
