ADITYA BIRLA GROUP

Annexure I: Intern

`

Basic Details:			
Business	Aditya Birla Management Corporation Pvt. Ltd.		
Unit	Group Data & Analytics		
Location	Bengaluru		
Department	Group Data & Analytics	**Position**	Intern

1) Purpose:

The intern will be assisting one of the team to create a holistic analytics project/asset that provides insights & recommended actions driving cost efficiencies in the business functions of several of our B2B & B2C businesses (Retail, Manufacturing, Textiles, Metals & Chemicals etc.) to help reduce costs and improve quality enhancing seamless backend operations.

2) Context & Exposure:

There can be diverse sets of roles within the GDNA family, with varying responsibilities and skill requirements. A brief description of the roles and skills is outlined below:

1. **Analytic Product Development**

- Collaborate with multiple technology teams and other product teams to build and iterate on products/projects that directly impact ABG businesses.
- Manage the implementation of critical projects, drive global, reusable, and configurable design, rule authoring, testing, integration, and product launch using low-code tools.
- This cluster includes a diverse set of roles, with varying requirements on technical acumen- from Low-Code tools to Pro-Code programming skills.

2. **Data Steward:**

- Manage end-to-end ownership of enterprise data assets used in business decisions for customers.
- Develop strong subject matter expertise on both internal and external data sets. Act as the custodian for data standardization, data governance, data quality, and data ownership while ensuring compliance and security of data. Build strong relationships, operate effectively within large cross-functional teams, and influence business stakeholders to drive change

3. **Project Management:**

- Solve complex business problems by ideation, development & ownership of next-generation technology projects and solutions to meet business objectives.
- Support execution of all product lifecycle processes including market research, competitive analysis, planning, positioning, roadmap development, requirements development, and project launch.

** Selected candidates will be allocated to one of these roles according to their fitment and business needs **
