Sr. Associate - Program Monitoring & Evaluation

"Ek Matanhail village ka bachha agar fashion ke baare main soch raha hai to zarur aap log achha kaam kar rahe ho" - Capt. Shakti Singh, DC Jhajjar

About us: Alohomora Education Foundation is enabling the ecosystem around young people to enable informed career decisions at scale. Our flagship 5 step career decision making framework, Careershala, enables exploration of careers through activities and reflection. We work with teachers and various education officials to institutionalize this career exploration & guidance in schools.

We work closely with UNICEF's Project Yuwaah, the Govt of Delhi and the District administration & Education department of Jhajjar, Haryana & Haridwar, Uttarakhand to support more than 3 Lakh students each year. We are looking to grow our impact rapidly over the next few years. We have recently been selected to be part of the EdumentumX initiative of Shikshalokam to scale our district level initiatives.

Role Background:
Impact means something different for different stakeholders. It's important to be able to capture and study ongoing data to ensure the program is progressing as per plan, take meaningful decisions on program design and also evaluate effectiveness of the intervention; and also capture and communicate *impact* at a human level.

What does our program mean for the stakeholders involved? This is the question we need to think about and answer for each important stakeholder.

What would be happening which would make us as a team *see* and *feel* that the program is delivering on its promise? What would a Govt stakeholder want to see - are we capturing and communicating that? What does our funder expect? How might 'impact' expectations change by geography and project?

While the program remains the same, as we grow (and want to grow further) we need to ensure that we are setting up strong processes and practices in place . And we are also capturing and communicating the essence of impact at a human level.

Role and Responsibilities:

1) Support in developing our monitoring design and its tools for the program cycles across different projects. This will include learning from industry best practices, and brainstorming with training and execution teams to understand what would work best for us for both collection of data as well as analysis and dissemination of it for internal decision making and learning.
2) Support in strengthening our baseline and endline tools across our programs including alumni support work to ensure effective collection of data to showcase our

impact. This also includes identifying the best data collection & analysis technology for our context.

3) Managing the end to end data collection & cleaning process by onboarding and training interns, consultants, team members etc based on need.
4) Analyze incoming data, create reports and work closely with a) training & execution team to ensure understanding and usage of data in ongoing program implementation b) communications/ fundraising/ founders to report data to external audiences including donor reports, grant applications etc c) design team to ensure continuous programmatic improvements.
5) Collect and share proof points of impact based on your own observations via regular field visits and discussions with team members.
6) Support other aspects of program design and training as per need.

Who we are looking for:

1) Sr. Associate: Either a leadership fellowship, Master in Education/Social Work or a couple of years of relevant experience in the development sector.
2) Excellent understanding of the context of youth in india- how they think, speak and what they want. An understanding of curriculum development for adolescents will be a benefit.
3) Good aptitude for numbers and data analysis.
4) An interest in learning about research methodologies, designing survey tools etc.
5) Excellent communication (English and Hindi) and facilitation skills to plan and engage with strategic stakeholders.
6) Excitement to work on the field and gather stories of change.
7) Strong drive to work independently in a fast-paced, action-oriented environment.
8) High openness and learning orientation to learn rapidly, adapt to changing courses of action, and willingness to take on multiple tasks during implementation.

Location: Delhi (Hybrid)

Compensation Range: Sr. Associate- Rs. 4.2-6 L pa.

To Apply: Expression of interest
