A good job description starts with an attention-grabbing summary of the position and its role within your company. Your summary should provide an overview of your company and expectations for the position. Outline the types of activities and responsibilities required for the job so job seekers can determine if they are qualified, or if the job is suitable for them.

Technical Writer responsibilities and duties

The responsibilities and duties section is the most important part of the job description. Here you should outline the functions this position will perform on a regular basis, how the job functions within the organization, and the title of the manager the person will report to.

- Plan, develop, organize, write, and edit operational procedures and manuals
- Research, develop, and document technical design specifications and test scripts
- Produce electronic documentation in addition to hard-copy manuals
- Maintain a comprehensive library of technical terminology and documentation
- Analyze documents to maintain continuity of style of content
- Manage updates and revisions to technical literature

Technical Writer qualifications and skills

- Master's Degree/PhD in Science/Education or Bachelor's with proven track record and inclination towards K-12 content.
- Proven experience working in a technical writing position
- Excellent written and verbal communication skills
- Proficiency in MS Office
- Strong attention to detail
- Able to write in explanatory and procedural styles for multiple audiences
- Skilled at prioritization and multi-tasking
