KEY RESPONSIBILITIES:

- Develop a deep understanding of all the functions within the org and develop and execute strategies for continuous process improvement within and between functions.
- High degree of focus on the mission of the organization, which is impact-focused. In that regard, take charge of developing, planning and executing regular impact campaigns, as well develop robust evaluation, assessment and reporting mechanisms for all impact formats within the company.
- Develop clear communication strategies between the founders and the rest of the organisation as well as external communications with investors, stakeholders, etc.
- Identify and apply for awards, grants, etc that are aligned with the organization's mission and will help build more recognition in the right circles
- Reporting and Metrics : Generating monthly reports that encompass key performance metrics and insights.
- EdTech Knowledge : Staying updated on trends and developments in the relevant sectors
- Flexible Role : The Founder's Office role is dynamic and multifaceted. As part of the team, you will be expected to take a proactive and adaptable approach to support the Managing Trustee in various key areas of the business.
- High level of initiative and an innovative approach to problem-solving.
- A can-do attitude is a must since the role is very ambiguous and will not look the same every day.
- Institutional Values and Culture : Promoting and fostering the institution's core values, ethics, and culture. Cultivating a positive and inclusive environment, ensuring adherence to academic integrity, and fostering a strong sense of community within the campus.

Eligibility criteria:

- Having an MBA Degree or Degree in Economics, individuals with degrees in social work are also encouraged to apply.
- Experience in developing and managing impact projects will be a plus.
- Any prior experience in a startup, esp in ambiguous roles like the founder's office with a flexible schedule and lots of initiative.
- Be a hustler who is as good at executing ideas as coming up with them, and someone who thrives in and builds through chaos, action and a fast-paced startup vibe.
- Process-oriented & tech-savvy. Ability to thrive in a fast-paced work environment.
- Be someone who wants to help build at scale and possesses great process-building and organizational skills.
- Excellent written and verbal communication skills.
