PROGRAM MANAGER
Green Cover Management and Watershed Restoration

We are looking for a high performing individual with experience in a managerial position. This position gives the environmental professional an opportunity to contribute towards increasing forest cover, restoring water bodies, and diverting ocean bound plastics from rivers and nalas!

1. Bachelor’s degree in Architecture, Environmental Engineer, Water Science, or Civil Engineering

2. Experience in green cover, waterbody restoration, and landscape architecture preferred

3. Experience in managing teams required

4. Stakeholder engagement, finance and budgeting, and communication skills are a must
