Established in 1994, we are based in India and have worked in over 25 other countries, exporting India's social development capacities, and bringing back learning and goodwill.

We are part of the Catalyst Group.
Integrated solutions to shape social equity | CMS

Role: Research Associate – Impact Evaluation Unit

Time Commitment: Full-time position

Location: Bangalore

Responsibilities:

- To support the portfolio of impact evaluation projects. The position will allow the selected candidate an opportunity to gain first-hand technical experience on projects that are at the forefront of economic research and public policy.
- Provide support to impact evaluations including design of baseline and follow-up surveys, questionnaire design, data analysis and management, statistical and econometric analysis, piloting in the field and incorporating feedback.
- Support data collection (on & off-field) and quality assurance activities, including working with the team to troubleshoot data problems and incorporating feedback.
- Assist and conduct exploratory data analysis, work with the researchers to work on analysing the data based on pre-analysis plan.
- Support the analysis of large-scale household and other surveys, impact evaluation datasets and other secondary data sources (NSSO, Census, NFHS, etc.) using STATA primarily, other software such as R, Python also work.
- Support the research by conducting literature reviews, working on research paper write-ups, research presentations and actively participating in meetings.
- Assisting in preparation of documents and presentations for client reporting as well as dissemination activities, prioritise and manage project deliverables, ensuring timeliness.
- Any other task as assigned by the Portfolio Manager and senior management.

Desired Competencies:

- A bachelor's/master's degree in economics, statistics, development studies, public policy education and/or related fields.
- Experience of 1 year in such role/development research (experience in writing research reports using primary and/or secondary data) preferably with interest/expertise in the domains of women

empowerment, livelihoods, public health, financial inclusion, climate in LMIC settings is desired, but not necessary. Exceptional freshers can be considered.

- Basic understanding and experience in quantitative research- statistical and econometric methods including quasi-experiments, RCTs and other quantitative/mixed-method techniques.
- Data management experience- questionnaire development, analytical frameworks, oversee data collection, cleaning, analysis, and synthesis, report writing, publishing academic learning briefs and papers with a team of research associates, and research fellows.
- Strong statistical programming skills using statistical software like, STATA, R, Python.
- Understanding quantitative datasets, data analysis and visualization of the data.
- Ability to work in a collaborative, multi-disciplinary, dynamic environment as part of a closely-knit team (demonstrating patience, tenacity, and grace under pressure).
- Fluency and excellent communication skills in English. Additionally, conversational fluency in any other Indian regional language or African language would be a strong plus.
- Flexible, self-motivating, able to manage multiple tasks efficiently.
- Detail oriented, with strong organizational, analytical, and problem-solving skills
- Agility to work in a fast-paced environment of deadline-based proposal submissions.

Remuneration: Based on industry standards as per the role.
