# Associate Applied Data Scientist

| | |
|---|---|
| **Job family** | Data & Analysis |
| **Sub family** | Applied Data Science |
| **Career band** | Associate – G1 |

## WHY I DO MY JOB | Job purpose

To work with senior team members to execute projects to distil complex problems into compelling insights, applying and embedding dunnhumby science.

## WHAT I DO | Key accountabilities

- Build strong relationships with immediate internal contacts to ensure full understanding of client requirements, ensuring clear and effective communication.
- Identify and implement the most appropriate analytical technique for each project with help from senior team members, re-using global solutions or code written by others.
- Deploy data science algorithms and market products on chosen tech stack for efficient and cost-effective delivery.
- Work with senior team members to distil complex problems into compelling insights.
- Participate, as required, in client meetings to help explain the solutions.
- Maintain robust documentation after deploying solutions to the client to capture relevant feedback and increase the existing knowledge sharing repository.
- Execute projects on time, working closely with senior team members for direction.
- Follow dunnhumby Quality Assurance processes, ways of working and meet coding standards.
- Implement advice from colleagues to resolve challenges.

## HOW I DO MY JOB

### Who I work with

| INTERNAL | EXTERNAL |
|---|---|
| • Applied and Research Data Scientist teams<br>• Client / Commercial teams<br>• Global Capability teams<br>• Data Science Engineering teams | • Retail / Customer Packaged Goods Analysts |

### Qualifications

| | |
|---|---|
| **DESIRABLE** | Master's degree or equivalent in numerate subject e.g. Stats, Maths, Physics, Economics or similar field.<br>Programming experience on any standard data mining and modelling packages such as Python and R. |
| **ESSENTIAL** | Bachelor's degree or equivalent in a numerate subject e.g. Stats, Maths, Physics, Economics.<br>Experience with and passion for connecting your work directly to the customer experience, making a real and tangible impact. |

### Leadership skills

| SKILL | PROFICIENCY LEVEL |
|---|---|
| **Work well with others** | Work as a team with others |
| **Build partnerships** | Build strong relationships with colleagues |
| **Drive opportunities** | Identify opportunities |
| **Create a vision** | Identify personal priorities |
| **Inspire others** | Demonstrate enthusiasm |
| **Make it happen** | Deliver work to high standard |
| **Focus on solutions** | Solve challenging problems |
| **Think BIG** | Be driven to improve yourself and the way things are done |

### Functional skills

| GENERIC FUNCTIONAL SKILLS | LEVEL |
|---|---|
| Business and Commercial Acumen | E |
| Change Management | E |
| Project Management | E |
| Data Analysis and Modelling | E |
| Stakeholder Management | E |
| Financial Analysis | E |
| dunnhumby Capabilities and Solutions | E |

| SUB FAMILY SKILL | LEVEL |
|---|---|
| Analytical Techniques | E |
| Analytical Technology | E |
| Desk Research | E |
| Prototyping | E |
| Quality Assurance and Testing | E |
| Statistical Modelling | E |
| Programming (Python, SQL, R, …) | E |
| Data Interpretation/ Insight Analysis | E |
| Data Visualisation | E |
| Insight Storytelling | E |
| Client relationship building and management | E |
| Presentation skills | E |

*A – Advanced, I – Intermediate, E – Elementary. Please refer to Functional Skills Framework for definitions of Skills and Levels.*
