FISCHERJORDAN

About FischerJordan
FischerJordan is a cross-disciplinary consulting firm that helps Fortune 500 clients achieve uncommon clarity, gain control, and win in the marketplace. We have delivered hundreds of millions of dollars of bottom-line impact for our clients. We believe that our work should improve the lives of people and be connected to meaning beyond profit.

Roles and Responsibilities

- Working directly with clients and FJ team members on a day-to-day basis to identify business needs, frame a solution approach, seek and obtain the data to solve the problem, run the analysis, and present actionable recommendations to drive results
- Working closely with US-based clients on US hours
- Identifying information sources, understanding database structures and data dictionaries to develop the optimal approach for data extraction, validation, and combination
- Conducting quantitative and qualitative analyses. This will include reviewing publications and interviewing appropriate industry experts. It may also involve developing predictive models under the supervision of a senior modeler
- Data extraction, preparation, validation, and manipulation using statistical analysis tools such as Python, R and SQL
- Delivering clear, actionable solutions to clients' business problems and measuring their results
- Creating strong client presentations and delivering them effectively
- Building and maintaining long-term client relationships

Requirements

- Strong work ethic and ability to work in US hours
- Competitive attitude and commitment to achieving results
- A Bachelor's degree in a relevant field
- Possess excellent analytical skills and attention to detail
- Hunger to keep up with the latest trends in consulting space
- Strong written and oral communication skills
- High levels of motivation, professionalism, integrity and entrepreneurial spirit
- Ability to handle multiple work streams and be able to deliver the best results under high-pressure situations
