FISCHERJORDAN

About FischerJordan

FischerJordan is a cross-disciplinary consulting firm that helps Fortune 500 clients achieve uncommon clarity, gain control, and win in the marketplace. We have delivered hundreds of millions of dollars of bottom-line impact for our clients. We believe that our work should improve the lives of people and be connected to meaning beyond profit.

Job Description: **Full Time Web Developer / SWE (Multiple Specializations)**

We are seeking 4 highly skilled Software Engineers and Web Developers to join our team at Fischer Jordan. As a SWE at FischerJordan you will work in a dynamic, client-first, solution-oriented environment. Our tech team is exposed to a large spectrum of real-world problems and expected to deliver world-class solutions on a timeline. We're keen on using newer, faster technologies and facilitate an open engineering culture of learning and skill development.
In this role, you will also be expected to effectively communicate with business stakeholders to problem solve and automate a variety of business practices. You should also be able to work effectively in a team environment and have excellent communication skills.

At the moment we're looking to onboard candidates with the following key skills:

1. Frontend Web Developer with UI/UX design experience (Fluent in React.js, CSS, HTML, Figma)
2. Frontend Web Developer (Fluent in React.js, CSS, HTML, Figma, WebGL, Animations)
3. Backend Web Developer (Extensive experience with Django and building REST APIs, used multiple DB stacks, experience with AWS and infrastructure setup, docker)
4. Flutter App Developer (Extensive experience with Flutter and mobile app development, Experience with UI/UX design, preferably using Figma)

Responsibilities:

- Design, develop, and maintain software solutions
- Collaborate with business stakeholders to identify and solve problems, and automate business processes
- Use data analytics skills to draw insights and inform decision-making
- Ensure the quality and reliability of software solutions
- Participate in regular team meetings and code reviews

Requirements:

- Strong work ethic and ability to work in US hours
- Competitive attitude and commitment to achieving results
- Fluency and extensive experience with your tech stack
- Strong problem-solving and communication skills, including the ability to effectively communicate with business stakeholders
- Familiarity with Git and version control
- Experience with data analytics (preferred, but not required)
- Bachelor's degree in Computer Science or a related field (preferred, but not required)

Compensation: Details given in the JAF
Location: Mumbai
