FOSTER AND FORGE FOUNDATION

CODIFICATION MANAGER

Introduction

Foster & Forge Foundation was established in 2015 with the belief that every child has the potential to positively impact their environment & contribute meaningfully to the growth of the country. What they need is the opportunity to explore their potential to build their capabilities and role models to inspire and show them the way. This is where the teachers step in, playing a revolutionary role in not only accelerating learning but also building Active Citizens. Foster and Forge is a part of the larger whole-child movement that has been advocated for by the NEP 2020.

We run a 2 year fellowship program for India's largest teacher community–government school teachers. Enabling them to consistently reimagine their classrooms through effective pedagogy and problem solving skills and in turn emerge as teacher leaders who empower their students to take charge of their future as active citizens.

Foster & Forge Foundation has been working with government schools in Uttar Pradesh for 8 years, taking the fellowship to all 75 districts of Uttar Pradesh. We are now in the process of envisioning what our impact could look like in the next 3 years to come and have expanded to other states like Uttarakhand & Haryana through strategically chosen demonstration sites where we codify and mainstream practices for the government.

About the Role

The Codification Manager will lead the organization's vision through forging strong partnership with the state and support in amplification of FNF's program at the state level.

Establishing FNF as a knowledge partner by engaging with government stakeholders to multiply the impact of our existing interventions.

Building relations with the state education departments and investing them to include learnings from the ground through FNF's interventions to become a part of the state policies.
