imagineer

Imagineers

Job Description

About Fractal

Founded in 2000, Fractal Analytics is a strategic analytics partner to the most admired Fortune 500 companies globally and helps them power every human decision in the enterprise by bringing analytics & AI to the decision-making process. Fractal has more than 3,500 employees across 16 global locations, including the United States, UK, Ukraine, India, Singapore, and Australia. Fractal has consistently been rated as India's best companies to work for, by The Great Place to Work® Institute, featured as a leader in Customer Analytics Service Providers Wave™ 2021, Computer Vision Consultancies Wave™ 2020 & Specialized Insights Service Providers Wave™ 2020 by Forrester Research, and recognized as an "Honourable Vendor" in 2021 Magic Quadrant™ for data & analytics by Gartner. It recently received a large ($360 million) investment from private equity firm TPG and is valued at over a billion dollars. For more information visit fractal.ai

Campus program: Imagineer

Role

Imagineer would go through a dynamic program offering them variety of projects with exposure to business value chain. This is an opportunity to become a future leader. Join us if you want a career & not a job.

As a part of the program, you will undergo preboarding program that focuses on building breadth of knowledge in all aspects of data to make you Fractal ready. Your performance in this program and business need will determine your career track (Information Architecture, Data Engineering, Data Sciences & Decision Sciences). Generic understanding of your role as an Imagineer in each track is as follows:

Data Visualization (Information Architecture): Deliver insight, innovation, and impact to our Fortune 500 clients through predictive analytics and visual storytelling.

- Understand business requirements and address them with conceptualizing and designing of solutions
- Learn and deploy BI solutions with minimal guidance (post training)
- Drive insights from data
- Deliver impact with automations & innovations
- End to end ownership of delivery
- Rigorous documentation & drive operational efficiency with guidance

Data Engineering: Work with a team that helps deliver our Data Engineering offerings at a large scale to our Fortune 500 clients worldwide.

- Learn and implement the best of engineering principles to build data pipelines to drive analytical insights leveraging Cloud native stacks and Cloud agnostic stacks (All of cloud services for each of the clouds, Open-source stack like Python, Pyspark etc.)
- Build data pipelines for both structured and unstructured data for real-time and batch-oriented systems
- Build composition-based data solutions leveraging Services oriented and Microservices architecture
- Build real-time solutions leveraging Digital and IOT data
- Build Lakehouses and Warehouses
- Develop next generation warehouse solutions using Knowledge graphs

Decision Sciences:

- Communicating with the clients and understand their business needs
- Work with large, complex data sets to solve difficult, non-routine analysis problems, applying advanced analytical methods as needed
- Build data pipelines, and dashboards for marketers to self-serve data needs; enable automated tracking of marketing campaigns
- Harmonize data as required and setup models according to the business logic defined

- Use statistical tools to identify and evaluate the relationships between data fields, analyse output and determine the next action

Data Science - the capability to work on independent statistical and machine learning research/ projects

- Ability to understand a problem statement and implement analytical solutions & techniques independently
- Conduct research and prototyping innovations; data and requirements gathering; solution scoping and architecture; consulting clients and client facing teams on advanced statistical and machine learning problems.
- Collaborate and Coordinate with different functional teams (engineering and product development) to implement models and monitor outcomes.

Perks & Benefits:

- Top performers of the batch would be eligible for 100% sponsorship to PG programs with premier B-schools in India
- Insurance Benefits, Relocation Benefits, Gratuity over & above CTC
- Work From home
- Shuttle service to office (select locations only)
- Unlimited Leaves, Sabbatical Benefits & loads of people friendly policies
- We serve Breakfast, Lunch & Refreshments for free

Education Qualification: BTech or MTech (Dual/Integrated) in any discipline or MA Eco/Statistics

Job location: Mumbai/Bangalore/Gurgaon/Chennai

Joining: July/Aug/Sept'23

Note: Fractal reserves the right to make changes in the program and the policies time to time.
