Job Profile: Associate - Research

About IIC:

IIC is India's pre-eminent 'not for profit' industry body with an exclusive focus on developing the Impact investing ecosystem in the country. Supported by more than 50 active members comprising most leading impact funds in the country, the key agendas for IIC include different aspects such as:

Engaging Capital Providers across asset classes and sectors to mobilise capital for impact

Moving Beyond Equity to explore innovative finance structures including debt and blended finance

Diversifying Impact Narrative in diverse markets such as climate-tech, gender lens among others

Engaging Regulators and Policy to facilitate a conducive policy environment for the development of impact finance

IIC has also launched a pioneering Blended Finance initiative - India Blended Finance Collaborative (IBFC) with the aim to catalyse Innovative Finance in India.

IIC is a small team with presence in Mumbai, Bangalore and Gurgaon. While we do have clearly allocated roles for all, our size keeps us flexible and entrepreneurial, giving opportunity to everyone in the team to work cross-functionally.

IIC's Research Agenda:

We are looking to augment our Research initiatives with an Associate - Research. IIC's research initiatives are aimed at enabling the impact investing ecosystem with evidence backed research, market insights as well as knowledge creation events and conventions that help unravel the potential and opportunities for impact investing in India.

The Role of Research Associate at IIC: Key Accountabilities

1. Primary & Secondary research: Engaging in data collation, organisation and analysis for arriving at trends and insights that aid investors in decision making. This research also includes deal tracking and database management of impact investment deals as well as blended finance transactions. IIC today manages possibly the only dedicated database of all India focussed impact related deals over the last decade.
2. Engaging in discussions with IIC members and other ecosystem stakeholders towards understanding industry insights and expectations
3. Knowledge creation and dissemination through research reports, white papers and periodic online bulletins that assess the impact investing landscape
4. Extending cross-functional support and collaboration towards other initiatives of IIC centred around investor outreach, member engagement and policy advocacy. The Research team supports the team with research inputs required for convenings, webinars and workshops with senior stakeholders in the industry

The typical output of Research driven tasks would be a research paper or a publication. Some of the research reports/newsletters published by IIC are listed below. More details of our work, events and newsletters are available at iiic.in and https://blendedfinanceindia.org/.

What kind of Person are we looking for?

1. A strong believer in the transformative power of finance used right with deep commitment to creating social impact.
2. An experience of 1-3 years with a strong interest / background in the Indian / International corporate sector/ financial market/ development sector with a high level of curiosity and strong learning orientation. At the margin, we are also open to looking at fresh graduates with exceptional academic credentials or a demonstrated tangible interest in the impact investing space.
3. A background in financial analysis / industry research / with a degree in finance is ideal. A good academic record is highly preferred.
4. Strong excel skills; excellent oral and written communication skills
5. Ability and openness to multi-task and work in collaboration with both internal and external stakeholders.
6. An entrepreneurial self-starter mindset

Why Work with IIC
