Role: Data and Technology Associate

Role Summary

About ISL

Vision: An India where all communities have the opportunity to thrive through sustainable economic development, citizen engagement, and innovation.

Mission: We build transformative educational programs using cutting-edge technology to empower disadvantaged communities and drive lasting social change.

ISL currently runs one program and two projects. Projects are in pilot stages and have the potential to be scaled into programs depending on their strong alignment to our vision.

The Adira Program	**Mission**: To empower promising girls from disadvantaged backgrounds, fostering their agency, decision-making skills, and aptitude for risk-taking while connecting them with leading global universities and emerging career pathways, thereby transforming their lives. **Approach**: 1. **Identify** capable and academically oriented girl students from economically weaker sections (EWS) backgrounds. 2. **Create** an ecosystem that provides comprehensive support, including knowledge, skills, growth mindset, and networking opportunities, while empowering them to exercise agency, develop risk-taking aptitude, and enhance decision-making skills. 3. **Foster** the development of values-driven leaders who can address complex community challenges. 4. **Prepare** students for admission to top global universities and success in emerging career pathways. Through continued engagement that begins in 8th grade, they will be equipped with skills and knowledge to help them get into college and support them until they graduate. Adira is a

	self-paced program that allows students to work asynchronously in some capacity.
The Critical Literacy Project (CLP)	**Mission:** Enabling teachers with tools and curriculum to develop critical literacy skills that will allow them to support students to think critically, be empathetic and question power structures. **Current Status:** Developing a certificate course for high school teachers that sets them up for including Critical Literacy in the classroom. **Project Goal:** To build a long term and sustainable teacher-learning solutions for Critical Literacy that includes upskilling, acquiring knowledge and continuous reflection
AI for SI	AI for SI is a social impact project that we are currently running in Chennai and Pune but it will be expanded to other cities in the coming year. **Project Mission** To build overview community maps of marginalised communities across India using AI, comprehensive surveys and drone mapping. **Objectives:** ● A data hub on top of an LLM for easy access and queries to the community map. ● AI predictive model for interventions and data extrapolations of future communities. ● Form a network of NGOs, Government Agencies, Schools, and Universities to use the data to implement effective interventions in marginalised communities. This will give them a running start. ● Data integrity: Continual surveys. Effect of interventions

Data and Technology Associate plays a pivotal role in leveraging data and technology to support ISL's mission and enhance our impact. They will be responsible for managing data, providing technology support, and driving process improvements across the organization which currently includes one program and two projects. Additionally, They will have the opportunity to engage in outreach efforts for projects and liaise with stakeholders to ensure alignment with organizational goals.

Roles and Responsibilities:

Data Management: Collect, organize, and maintain datasets relevant to our organization's programs and operations. Ensure data accuracy, integrity, and security.

Data Analysis: Analyze data to extract actionable insights and inform decision-making processes. Produce reports, dashboards, and visualizations to communicate findings effectively.

Technology Support: Provide technical support and troubleshooting assistance to staff members on various technology platforms and tools. Serve as a liaison with external IT vendors as needed.

Systems Administration: Administer and maintain databases, software applications, and other technology systems used by the organization. Implement upgrades and updates as required.

Process Improvement: Identify opportunities to streamline workflows and enhance efficiency through the use of technology solutions. Develop and implement process improvements as needed.

Training and Capacity Building: Develop training materials and conduct training sessions for staff members on data management best practices and technology usage. Build organizational capacity in data-driven decision-making.

Collaboration: Collaborate with cross-functional teams to support the integration of data and technology into programmatic activities and strategic initiatives. Participate in project teams as needed.

Compliance: Ensure compliance with data protection regulations, privacy policies, and organizational data governance standards. Stay abreast of emerging trends and best practices in data management and technology.

Outreach and Stakeholder Liaison: Collaborate with cross-functional teams to support outreach efforts for projects. Engage with stakeholders to gather requirements, communicate project updates, and ensure alignment with organizational goals.

Data hub Management: Engage with NGO and community partners for AI for SI project and provide training on how to access the data hub. Manage/maintain data hub created through surveys in the community. Operate an Agent on top of a Large language model to help partner NGOs and agencies access information from the data hub for interventions.

Requirements:

- Bachelor's degree in computer science, information systems, data science, or a related field.
- Previous experience in data management, analysis, and technology support preferred.
- Proficiency in data analysis tools and software (e.g., Microsoft Excel, SQL, Tableau).
- Strong problem-solving skills and attention to detail.
- Excellent communication and interpersonal skills.
- Ability to work effectively both independently and as part of a team.
- Commitment to the mission and values of the organization.

Location: Remote

Compensation: Salary commensurate with experience.
