Role: Associate/Manager, STEM Curriculum and Facilitation

Role Summary

About ISL

Vision: An India where all communities have the opportunity to thrive through sustainable economic development, citizen engagement, and innovation.

Mission: We develop entrepreneurial, principled, impact-focused leaders to solve India's pressing problems.

About the Adira Program

Mission: To transform the lives of promising girls from economically weaker sections of society by connecting them to global higher education opportunities and emerging career pathways.

Approach:
Identify capable and academically oriented girl students from EWS backgrounds
Bring them to an ecosystem that equips them with knowledge, skills, mindsets and a rich network.
Foster their development into values-driven leaders who can solve complex problems in their communities.
Prepare them to attend the top global universities

In this highly selective program, the participants would enter the ISL's ecosystem, which would nurture them as young social leaders. They will get direct entry into ISL's leadership camp, and they will be provided with mentors in India and abroad. Through continued engagement that begins in 9th grade, they will be equipped with skills and knowledge to help them get into college and support them until they graduate. Adira is a self-paced program that allows students to work asynchronously in some capacity.

The **Associate/Manager, STEM Curriculum and Facilitation** will work with the curriculum team under the guidance of the Director of Curriculum and Facilitation.

The candidate will play a crucial role in developing, implementing, and facilitating learning spaces for students who are selected for the Adira Program. This will involve designing and delivering engaging and impactful learning experiences that are tailored to the needs of the students and that help them to develop the knowledge, skills and strategies they need to successfully navigate high school and competitive exams in STEM.

The candidate will also be responsible for designing and implementing monitoring tools that will guide the evaluation process of student learning.

The candidate will work closely with other members of the organisation to identify areas where the program can be improved and to implement changes that will enhance the experience of students. This may involve collaborating with program designers to refine the curriculum, working with facilitators to improve the delivery of learning experiences etc.

Overall, the candidate will need to be highly organised, detail-oriented, and adept at working in a fast-paced, dynamic environment. They should have excellent communication and interpersonal skills, as well as a deep understanding of adult learning theory and principles of program evaluation. They should also be committed to the organisation's mission of supporting changemakers and creating a positive social impact.

The position will be decided based on qualifications and experience.

Roles and responsibilities:

1. Plan and execute a comprehensive STEM curriculum that meets the needs of the students.
2. Create scaffolded yet rigorous plans that motivate students to learn the subject.
3. Use customised strategies that enable differentiation and individual learning for each student.
4. Evaluate and assess the effectiveness of the curriculum on a regular basis, making modifications as necessary.
5. Conduct check-ins with the students to ensure they receive the support and guidance they need.
6. Use Khan Academy for High School Math and Science, SAT preparation and remediation.
7. Set goals with and for students, and set up mechanisms to hold them accountable.
8. Provide SAT support in Mathematics.
9. Provide support in Advanced Placement Mathematics for students who are keen for careers in STEM.
10. Curate a bridge program for High School Mathematics, Science, and SAT as needed.
11. Identify and recommend appropriate resources, including software and other instructional materials.
12. Create evaluation metrics for students and support the team with Monitoring, Evaluation and Learning (MEL).

Key Qualifications & Experience

- ***Professional Experience***

1. Educational background in STEM.
2. Passion for STEM education and youth development.
3. Proven facilitation and coaching skills.
4. Direct experience working with adolescents, either in formal or informal educational settings.
5. Detail orientation and organisation skills.
6. Data analytical skills.
7. Fluent in English.

- ***Personal Characteristics***

1. Resourceful self-starter.
2. Be adaptable and flexible
3. Structured problem solver.
4. Clear communicator.
5. Ability to collaborate with a diverse group of people.
6. Responsive to feedback and changing needs.

- ***Proximate Experience***

1. A strong understanding of Indian culture and regional differences is highly desirable
2. Experience with working with ESL learners.
3. Familiarity with Khan Academy.
4. Verbal communication skills in Hindi are preferred but not necessary.

Location: Remote

Compensation: Salary commensurate with experience.

To apply, send your resume, cover letter and response to the following questions in the below form https://forms.gle/5Z1BfiZzHCZ9n7pX7
If you have any questions, please email us at jobs@indianschoolofleadership.org.

1. At ISL we're a diverse team with differing backgrounds and skill-sets. Given this context, can you describe a situation where you had to collaborate with a diverse group of people to achieve a common goal? What strategies did you use to ensure effective collaboration?
2. What are some of the latest developments in the field of STEM education that have caught your attention? Please support this with ideas on how you would incorporate them into your curriculum-building and facilitation techniques.
3. In your view, how can STEM education make a positive social impact in disadvantaged communities (particularly for women) and what role do you see yourself playing in achieving this impact?
4. What's one thing that you believe the current education system has completely gotten wrong and would need to drastically shift with regard to Math & Science instruction? Please support this answer with what you would do differently.
5. Can you share an example of a time when you faced a significant challenge in curriculum development or facilitation? How did you handle it and what did you learn from the experience?
