About Us

Indus Insights is a VC-funded. ISO-27001 certified, specialized management consulting firm focused on the Financial Services. Our leaders are quoted by leading global publications such as Forbes, CIO magazine, VentureBeat, Fox Business, Information Week, etc. This is a phenomenal opportunity to use **Analytics & Machine Learning** to address some of the most exciting problems **in fintech, banking & digital sectors**. These positions are front-end roles, wherein you will work **directly with CEOs, CMOs, CROs, and Heads of P&L** and will have complete ownership for one or more projects.

Why Indus?

- High potential growth organization for someone who is keen to climb an **exponential growth trajectory.**
- Exposure to **multi-faceted projects** over years helps one gain thorough insights into the business.
- A set of smart & extremely bright team which drives the unique culture of Indus.
- Cutting edge work wherein data science meets **Fintech and Insurtech** with presence across multiple countries.
- **Strong employee focus** and hence Personality Development of every individual is essential.

If you like the overlap of **business, math, and technology,** and enjoy working in a fast-paced environment, this role is tailor made for you.

Roles and Responsibilities:

1. **Drive analytics projects for our clients**
    a. Work with your manager to give an analytical structure to seemingly vague business problems.
    b. Develop a problem-solving approach; Participate in brainstorming sessions with the team.
    c. Manipulate datasets from a variety of sources; Merge datasets, perform data hygiene, and create analysis/Modelling conducive datasets; Be the subject-matter expert on client data and trends.
    d. Use regression and machine learning techniques to create predictive algorithms; Evaluate the performance of algorithms, validate these, and perform statistical tests.
    e. Develop economic valuation models, perform validation, and design business strategies using such models.

f. Develop business recommendations using predictive/ econometric models, perform impact sizing, stress testing, and create business cases and presentations to be shared with CXOs.

2. **Client and Project Management**
   a. Work with client maps to understand the business context and data trends; Partner with them to address data issues and ensure consistency between data trends and actual business performance.
   b. Present findings, updates, and recommendations to clients on a periodic basis.
   c. Ensure smooth delivery of the project, provide periodic updates to Indus leadership & to clients, highlight roadblocks, etc.
3. **Other Activities**
   a. Be involved in hiring activities of Indus.
   b. Be involved in Recruitment drives, L&D, Knowledge share initiatives within the organization and contribute to the overall growth of the company.

Key Expectations

1. **Experience and Professional Qualifications:**
   a. Bachelors and/or Graduate with MBA, preferably with a specialization in relevant disciplines from a top institute/ university.

2. **Behavioral Competencies**
   a. A curious person with a drive to solve business problems and being solution oriented.
   b. Someone with an entrepreneurial mindset & humility.
   c. Be inclined to be a part of high growth company.
   d. Highly collaborative in nature and drive excellent relationships.
