Job Description: Project Associate

Position Overview: We are seeking a highly skilled and motivated Project Associate with strong technical expertise to join our dynamic team. As a Technical Project Associate, s/he will play a crucial role in supporting and managing various technical projects, working closely with product managers to ensure their successful delivery. Knowledge and familiarity with front-end technologies like Angular and React, as well as back-end technologies like PHP, will be instrumental in driving the development of cutting-edge solutions for our products. The ideal candidate is a proactive problem-solver with excellent project management skills and a passion for staying abreast of the latest technologies and industry trends.

Work arrangement: Hybrid (Delhi)

Job Description –

1. Project Planning: Collaborate with product managers to define project scope, objectives, and technical requirements. Assist in creating comprehensive project plans, including timelines, milestones, and resource allocation.
2. Technical Expertise: Leverage your in-depth understanding of front-end technologies (Angular, React) and back-end technologies (PHP) to communicate effectively with engineering teams. Translate technical requirements into actionable tasks and ensure successful project implementation.
3. Resource Management: Work closely with cross-functional teams to ensure optimal allocation of resources for project tasks. Monitor resource utilization and adjust plans as needed to meet project goals.
4. Collaboration with External Vendors: Foster strong working relationships with external vendors, suppliers, or partners involved in technical projects. Facilitate seamless communication and coordination to achieve project deliverables.
5. Risk Management: Identify potential risks and challenges that may impact project delivery. Collaborate with product managers and teams to develop effective risk mitigation strategies.
6. Project Execution: Oversee the day-to-day execution of technical projects. Monitor project progress, identify bottlenecks, and take proactive measures to keep projects on track.
7. Communication: Ensure efficient communication channels between product managers, engineering teams, stakeholders, and external vendors. Provide regular project status updates to keep all relevant parties informed.
8. Quality Assurance: Collaborate closely with quality assurance teams to uphold the highest standards for project deliverables. Participate in testing and validation activities to ensure flawless execution.
9. Documentation: Maintain accurate and up-to-date project documentation, including plans, reports, meeting minutes, and action items. Make documentation readily accessible to all stakeholders.
10. Continuous Improvement: Identify opportunities to optimize project management processes and methodologies. Contribute to the enhancement of project management tools and templates.

11. Cross-Functional Collaboration: Foster a collaborative work environment by liaising with various teams, including product development, design, support, and external vendors, to align project objectives and ensure seamless project execution.

Desired Candidate's profile –

● Bachelor's degree in Computer Science, Engineering, Information Technology, or a related technical field.
● Proven experience in technical project management, preferably in software development or IT projects.
● Strong technical background with a deep understanding of front-end technologies (Angular, React) and back-end technologies (PHP).
● Familiarity with project management tools and techniques (e.g., Agile, Scrum, JIRA, Microsoft Project).
● Excellent communication and interpersonal skills to effectively collaborate with cross-functional teams and external vendors.
● Exceptional organizational and time management abilities to manage multiple projects simultaneously.
● Analytical mindset with the ability to identify and resolve project-related challenges.
● Attention to detail and commitment to delivering high-quality work.
● Ability to thrive in a fast-paced and dynamic environment.
● Leadership skills to motivate and guide teams towards project success.
