CENTRE FOR THINKING, LANGUAGE AND COMMUNICATION

Job Description: Teaching Fellow

The Centre for Thinking, Language and Communication (CTLC), housed at Plaksha University, endeavors to instill an appreciation for critical inquiry and a flair for communication skills in a technology institute and aims, thereby, to make fresh advances in the broader academic and professional technology communities. The CTLC offers opportunities and products that enhance the power of thinking, language, and communication in the students, staff, and faculty of Plaksha University to foster a communication style that equips them to broaden their vision of the world.

CTLC curates and delivers courses to Undergraduate students and PhD scholars at Plaksha University. The vertical within CTLC that focuses on this is called stemX. The courses cover domains spanning communication, philosophy, and humanities. CTLC's innovative pedagogy involves a combination of lectures, experiential activities, and personalised tutorials to support student learning.

Your main responsibilities will include holding tutorial discussions with students, conducting assessments, and course administration. You will collaborate closely with faculty and our research team to ensure that student learning is aligned with pedagogy and curriculum goals. Apart from this, you will work on research papers with our internal faculty and international partners, specifically contributing to the quantitative research. To succeed in this role, you should have a passion for education, curiosity about science and technology, and experience as an adult educator.

Key Objectives and Responsibilities:

- Participate in designing and delivering courses in the fields of communication and humanities
- Facilitate tutorial discussions based on course content and faculty requirements
- Assist in assessing assignments and grading
- Perceive gaps in student learning and share feedback with faculty
- Contribute to quantitative and qualitative research on engineering education
- Impeccable communication skills

Desired Skills and Experience:

- Ability to synthesize and simplify complex research and develop appropriate tutorial prompts
- Background in engineering and technology
- Proficiency with data analysis and familiarity with statistical tools
- Any media related skills are an added bonus

Recruitment Process:

If you are interested in this position, please write to ctlc@plaksha.edu.in with a brief note (300 words) on why you believe this position is meant for you, and your updated CV.
