Position: Sr. Learning Associate
Role: Learning and development/ eLearning Content Developer
Location: Bangalore / Mumbai
Compensation: 7 LPA

What you are signing up for

TNS India Foundation is actively scaling-up our Campus to Corporate (C2C) (watch video) team that works passionately towards tackling the ever-growing skill gap challenge faced by youth in developing countries like India. Through our proven program design, we work to identify, skill and empower underprivileged youth through a combination of skills training, career counselling support and corporate linkages. The program embeds itself in the ecosystem of existing education providers and works to create system level change and student empowerment from the ground up. We have worked with over 10,000 students in Mumbai in the last 6 years and are looking to expand on the transformative change catalysed to empower more young people across cities.

The program's success hinges on young people passionate about other young people, thinking and executing ground-level initiatives that have a measurable impact on youth employability issues. The role calls for an organized and empathetic approach to working in this dynamic ecosystem. The individual must demonstrate commitment and zeal to scale the impact of this intervention. If this program is for you, you are young, talented and are looking to commit your energy to changing the course of youth employability issues in India.

The Job

1. Updating existing curriculum to match current needs of the program.
2. Monitoring student engagement with content on the LMS.
3. Creating lesson plans for online and in-person training programs.
4. Following up with trainers to check the efficacy of courseware used in the training program.
5. Creating assessments and activities to check the application of concepts taught through learning materials.
6. Creating Storyboards for different learning formats as required.
7. Maintain curriculum related documents and keep an inventory of version control.
8. Providing other support as the role may require.

Details

The senior learning associate will work exclusively with the learning manager/lead to address the needs of various programs run by TNS across various locations. The role requires engaging with trainers and students to ensure that all learning material and assessments are up to date and relevant to the learning needs of students and requirements listed by the program owners.

Preferred Skills & Experience

1. 2 years of experience in the areas of instructional design, learning delivery and learning technology.
2. Experience in Adult learning and Curriculum and Development in Edtech or corporate training.
3. Experience in using rapid development tools, authoring tools, and LMS/ LCMS to create and publish engaging and interactive content.
4. Experience in instructional designing and video storyboarding is must.
5. Knowledge of designing game and simulation-based learning solutions.
6. Experience in developing bite-sized learning and designing for mobile learning.
7. Visualize media to support learning (visual aids for ILT, multimedia for WBT).
8. Creating assessments, learning materials, activities that are engaging.
9. Adapt instructional materials created for one delivery model to another (usually this is adapting materials from ILT to WBT).
10. Experience in ESL training is a plus.

Desirable Attributes

1. Ability to work effectively in an agile, continuously evolving, and sometimes ambiguous environment.
2. Ability to research extensively.
3. Ability to create/write content.
4. Ability to adopt new tools and technology to aid efficient content creation.
5. Experience in working with global teams, cultures and industries.
6. Expert technical knowledge in Microsoft Office and Google suite.
7. Hands-on experience with Learning Management Software (LMS).
8. Familiarity with video editing software.
9. Effective communication in visual, oral and written form.
10. Cross-cultural competence.
11. This is work from the office with occasional work from home privileges depending on the work requirement.
